As Pakistan has been ranked 99th out of 126 countries in the Global Hunger Index (GHI) report released in July 2023. The report reveals that Pakistan's score has dropped from 38.1 in 2006 to 26.1 in 2022. Yet the hunger level is described as serious. (Pakistan's Persistent

Sher BAZ). Therefore, the economy impacts
on the lives of Pakistani people

Conundrum Economy and its impact upon children:

Conundrum economy leaves great impact upon children's life. Children are the future of a country. If the children are not properly nourished then they cannot take part in the progress of a country. Pakistani people cannot give proper food to their children due to the economic crises. If people cannot feed their children properly then they become the victim of various diseases. The SDG 2023 report shows that the world is moving in backward in eliminating the malnutrition in the world. It shows that "Despite the global effort, ⁱⁿ 2022, the 45 million children under 5 faced wasting and 198 million children are stunted and 37 million are overweight." (Pakistan Persistent Hunger crisis, sep, 1, 2023, Mir Sher Baz)
