Summary

Likewise, inadequate infrastructure and dearth of government investment make the education sector more worse. Nevertheless, there is still light at the end of tunnel that the education system can be restructured. Government should pay attention to promoting gender equality in general and access to quality education in particular. Similarly, the time has come to update curriculum to include to increasing fund and resources allocation. Implementation of strategies for educational reforms can serve as a catalyst for change. In short, the Pakistan's education system underscore the urgent need for government to address it. This essay will explore the way forward for restructuring education system.
