Title :- The importance of affection of teachers ^{for} ~~with~~ children

Precis

Modern educationists prefer not to interact with children ^{and enjoy} rather than ~~enjoying~~ their company. If teachers show liking for children, they will be more responsive to their ideas without complaining much. Children will not feel thankful, ^{sense} if one ~~tries to create in them a social sence~~ and has in mind ^{hidden motive} some future expectations of them. The most important thing for ^a teacher is to show interest in children with pleasure without any hidden purpose. Unluckily, over-worked teachers ^{cannot} can't show affection for children. Teachers contact with children should not exceed two hours a day. Good relation of teachers with children should exist but ^{within} with-in certain limits. Along with that, these limits cannot replace affection of teachers with children.

Generally ok. Mistakes identified. Avoid informal words such as can't, doesn't etc. Improve connectivity.
