

Argumentative Paragraph Writing

Information Technology In the modern world.

① Blessings: Information Technology in the modern world has made communication easier.

Topic Sentence:

The rise of Information Technology in the modern world has made communication easier.

Explanatory Sentence:

With the introduction of wireless devices, users can enjoy communication on the go.

Supporting Sentence Point:

Wireless devices like cell phones, blue tooth, and wi-fi etc have made it possible to communicate with friends, family, co-workers etc. Moreover, user can enjoy audio-video calls, instant text messaging, with the help of cell phone. Indeed, most of the world population communicate through cell phone.

Evidence: According to Federicia Larrichia, the global cell phone penetration rate was estimated at 68% in 2022, up from the

first time since 2018. This is based on estimated 6.8 billion smartphones subscribers in the world ^{with} ~~over~~ a global population of 7.4 billion. This clearly indicates the user interest in cell phone communication.

(Statistica.com | Smartphone penetration world wide | May 2023)

Concluding Sentence:

To conclude, communication has been made easier by one of the application of Information Technology i.e., cell phone.

2) Online Learning made achievable:

Topic Sentence:

Not only Information Technology has made communication easier, but it has also made online learning much more achievable.

Explanatory Sentence:

With the help of different softwares, students can easily access online learning platforms.

Supporting Sentence:

Softwares like Moodle,

Google classroom, Zoom and Canvas has made it possible for the students to access virtual classrooms, resources and they can also get in contact with the peers and best instructors from around the world.

Evidence:

According to Melanie Lazare, Google classroom helps more than 160 million students, educators and school leaders around the world to teach and learn up from 40 million last year. This shows that students are interested in joining online learning platforms, due to its easy accessibility with the help of Information Technology.

Concluding Sentence:

To summarize, with the help of Information Technology, students can easily access online learning platforms.

Curses:

- ① Mobile Threats are increasing.
- ② Online Learning leads to Physical Inactivity.

Transition: with the blessings of Information Technology furling the world, the curses also persists.

Mobile Threats are Increasing:

Topic Sentence:

^{advancement in}
Due to Information Technology, mobile communication has increased and this increase in communication has posed serious threats to mobile communication.

Explanatory Sentence:

The absence of robust security measures has rendered mobile communication susceptible to hacking threats.

Supporting Sentence:

Smart phones have digital processing assistants with access to user information like contact information, email, GPS navigation etc. With the absence of security layer, hacker can steal contact information, text messages, call histories, and perhaps photos, resulting in selling of data or blackmailing the users.

Evidence:

Paul Ruggiero shares an example of how hackers have exploited the smart phone markets. He shares an example of Valentine's day Attack, in which attackers distributed a mobile-picture sharing application that secretly sent premium-rate text messages from the users mobile phone. This clearly shows that mobile communication is vulnerable to hackers.

2) Online learning ~~platforms~~ leads to Physical Inactivity Topic Sentence:

With Information Technology in the modern world, threat to mobile phone communication has increased, whereas, its easy access to online education learning has paved the way for physical inactivity among the students.

Explanatory Sentence:

Due to online learning, physical inactivity among the students has resulted in social isolation.

Supporting Sentence/Point:

Students engaged in online learning platforms spend extended hours glued to their screens, resulting in reduced social interaction with family and friends, as well as decreased engagement in outdoor activities, leading to physical inactivity.

Evidence:

Researchers in American Academy of Pediatrics conducted survey on 1290 students of ages between 5-12. Among 1290 student, 63% of parents reported a decrease in child physical inactivity due to online learning, compared to 30% of the parents whose children were taking on-campus classes. These stats proved that online learning platforms have

contributed significantly towards
physical inactivity. (Melissa Janco/Virtual
Education and Physical Inactivity | March 2021)
Concluding Sentence:

In a nutshell, physical
inactivity among the student is one of the
drawback of ~~the~~ Information Technology
In the Modern world.
