case in point: Post-Covid-19 Pandemic

D. Escalation in prices of digital gadgets

E. - Rapid surge in Laptop prices during lockdowns

F. Threat of plagiarism with online education

5. Conclusion.

Essay

The advent of the 21st century introduced the world with an education system, which is different, unique, effective, and more convenient than the traditional education system.

Online education is a system where one can teach and learn at

one's home, office, library or anywhere they feel comfortable and convenient. It was first introduced in the developed countries and in top institutions of the world. However, Covid-19 introduced it to the globe wholly without discriminating between the developed and the least developed. It was after the global shut down of education worldwide in result of lockdowns that education systems of the world were forced to shift to online education; where teacher taught students via digital platforms like zoom, meet and google classrooms. The drastic shift to online education familiarized teachers and students with the digital means of learning, it safeguarded students from being bullied, provided students competent faculty, and it has proved more convenient for teachers and students to interact and share material with each other. Nevertheless, it has posed some challenges like escalation in digital gadgets' prices, threat of plagiarism and provision of high speed internet required for it. The essay will provide an insight into the greater opportunities provided by online education and some

preamble to topic is too long. intro should clearly reflect your stance sufficiently as well

challenges associated with it.
