Conclusion

already discussed

Blood and tears, violence and mayhem, love and hate — these are the rocks upon which peaceful world is bound to coexist. Since the emergence of industrialization (1960), these peaceful rocks have been rolling into a tangled web of violence, unrest, and instability at large scale. At the present moment, the world peace has largely remained a night-maish dream to turn into a reality due to the invasion of super-powers to smaller countries, marginalization of the labour classes, and due to the wave of dis-information. In contrast

to this, many people opined that world peace is not merely a utopian dream but can be a reality. This reality is evident in rising level of diplomatic normalizations for global peace. In current scenario, world peace is tilting towards a dystopian nature in various arena such as marginalization of capitalist classes, green-washing, and geo-stratic invasions. Therefore, world peace remains a utopian dream which holds no reality. However, some might disagree with this notion which does not seem much convincing.

The manifestation of dystopian nature of world peace are outline inter-alias as ~~transitions~~

The invasion of super-powers to smaller countries can derail the fabric of global peace. The deliberate nature of invasion invokes anxiety and disrupts supply chain globally. For instance, the invasion of Russia to Ukraine in 2021 shackled the global peace as it disrupted the global supply chains. This indicates that super-powers

are keen to invade the smaller peaceful state. In resultant, such kinds of invasion ~~trite-up~~ the world peace.

Besides invasion, the prevalent ~~ee~~ of capitalistic classes tend to marginalize the lower labour classes. This marginalization engenders the world peace where capitalistic market failed to empower workers financially. The manifestation of this is evident from a recent strike of United Automobile Workers (UAW) in America. In August (2023), the workers of automobile companies held strikes against for discriminate nature of wages they have been getting. Hence, this indicates that marginalization of labour class can cause harm to peaceful existence.
