

Economic Indications and Pakistan

Date: _____

Economic indications do not bode well for Pakistan. The country has been ~~strangling~~ ^{strangled by} with economic downturns since long; however, in one and half year, it has grappled with severe economic problems. National Reserves have reduced to a lowest ebb, circular debts have increased manifold, and foreign direct investment is also, seemingly, breathing ^{its} his last. According to ^E Economic ^S Survey of ^P Pakistan, Gross Domestic ^{Which year?} product (GDP) ^{has slowed} slows to a 0.4 per cent annual rate during the second half of 2023. To top it all, economic sector of Pakistan is not in a good position.

Active/passive voice needs improvement.
