

Expanding Artificial Intelligence: A Curse or Blessing

Date 19.09.2023

Outline

1. Introduction

A. Emergence of artificial intelligence in the 21st century

2. Understanding Artificial Intelligence

A. Emergence of chat GPT, Bard

3. Describing How Expanding Artificial Intelligence is a Blessing

A. Cures the incurable disease
Case in point: WHO report on A.I's potential

B. Ability to save precious human lives → clarify
Case in point: US-Mexican border

C. A tool of time saving for professionals → how?
- Researchers, Academics, Students, Lawyers, Doctors, Mathematicians

D. Ability to perform repetitive tasks

E. Performance of hectic tasks
- Data Analysis

F. Bridges the language barrier
Case in point: Chat GPT Platform

G. Ability to resolve climate related problems

Case in point: Integration in disaster management of Japan

H. Capable of helping in industry growth

Not discussed in paper

Masha

Attempt Again

no sub heading in conclusion
sub heading paper

Case in point: Pew Research 2022

I. Enhance military capabilities of a country

Case in point: USA's AI run robots in war-zones.

J. Ability to reduce automobile accidents

Case in point: AI powered road brakes in cars.

4. Artificial Intelligence As a Curse - A Counter Perspective

A. Risk of massive job displacement

Case in point: Yuval Noah Harari's research article

B. Compromising sensitive personal and state information

Case in point: US elections of 2016

C. Threat of disinformation

Case in point: Information of Maulvi Tamizuddin case on ChatGPT

D. Over-reliance detrimental for mankind

5. Conclusion

This negates all arguments above these points in lesser's. This is not clear to reader. What is your stance? Give the opposing argument and then negate side of greater. Give the opposing argument and then negate side of greater with greater sub-points.

Essay

The world today is experiencing rapid developments and inventions. Among those is an invention, that has amazed the world, it has done so by its - super intelligence. It is none other than artificial intelligence, (AI) which has revolutionized the every field of science, economy, and development. Its ability to perform repetitive tasks and its access to vast data and information is the reason for emergence of artificial intelligence in the 21st century. It is being renowned the biggest achievement of late 21st century by Forbes magazine. It is because of its the numerous blessings that come with the expansion of AI. These mainly include its ability to save precious human lives, time, and money. Moreover, it can bridge the ^{remove} gap of languages barriers and resolve climate related problems. Nevertheless, AI does has some curses attached with it, which mainly include a threat of job displacement, threat of disinformation and sensitive information leaking sensitive information. The essay will establish that expanding A.I is a blessing in various manners, and will provide some minimal yet exaggerated

intro para serves three main purposes: hooking the reader, explaining writer's understanding of the topic and the writer's stance on it logically.

courses associated with expanding Artificial intelligence.

attempt the intro again keeping in view the above three factors
