## CSS preparation

Today is Wednesday, April 24, 2024, I am sitting in my study chair with piles of books surrounded by me. ~~Recently, I am think~~ Recently, I have thought many things to do for my CSS 2025 preparation. I thought to buy reference books, <sup>1002F</sup> pages for making notes, and to make an attractive time table to follow during the whole year. However, I have succeed to achieve most of them. Moreover, many CSS aspirants face difficulty to remain persistent during ~~road~~ their journey, but I am lucky to have the quality of perseverance. When I first started my preparation in 2023, I was very ~~energetic~~ <sup>thrilled</sup> to go an extra mile. Nonetheless, I gathered courage, bravery to sustain my this calibre. Furthermore, my roommate, Saiha Banu, is also an ambitious person to reach towards her goal that is the pivotal part ~~of her~~ <sup>of</sup> studying with her. ~~etc~~. There is a famous saying, "The person better company decides his bright future." I second that, and I try my best to remain in a positive ~~and~~ circles of the students. In addition <sup>to</sup> of it, there are some questions asked by CSS aspirants for ~~CSS~~ <sup>exam</sup> preparation, which

DATE: \_\_\_/\_\_\_/\_\_\_

Includes, "what would be the reference books for optional subjects?" "How many hours should be given to the teaching in a day?" Likewise, many other questions. On this regard, I would like to answer them.

They, respected students don't worry with the passage of time, or through self-struggles you get the right answer of them. Coupled with it, those students, who are studying from academies, in Islamabad, Lahore, Pakistan they are well-aware of the preparation techniques. Therefore, interacting with them are fruitful for the academy aspirants. To conclude it, CSS preparation is tough, difficult, but it can be easy when follow the smart rules and method of studying throughout the learning period.
