- 7 Tackling Natural disasters.
 - 7.1 Planting and maintaining
 - 7.2 Minimizing use of hydrocarbons.
- 8 Stabilizing Economy.
 - 8.1 Seeking developmental agreements.
 - 8.2 Efficient allocation of HR
- Conclusion

Sometimes, you have to burn yourself to the ground before you can rise like a phoenix from the ashes. (J.K. Rowling). All the great nations faced hardship and struggled continuously before they rose to success, fame and stability. Such are the examples of countries like India, Bangladesh and China etc. India, that got its freedom along with Pakistan, is now an

economic power due to its struggle, policies and leadership. Likewise, Bangladesh, which started from scratch upon separation from Pakistan, is nowhere lagging behind. The world history is full of such cases where a depressed nation rose to dominance merely due to hardwork and determination. Examples are China, United States of America and Israel. But, Pakistan, on the other hand proved to be the opposite, due to its incompetent leadership, poor human resources and bad strategies. To restart like a phoenix, Pakistan needs to burn like one; Burn in hardship, struggle and labor. Pakistan needs to make due changes to its policy in every sector starting with education. As education lays the foundation of any nation's future, Pakistan could start with revamping it just followed by innovations in technology and other crucial sectors.
