

## (No Good Options)

Since, 7 October 2023, Israel is carrying brutal attack on Gaza, killing almost more than 39000 people, <sup>where</sup> majority of them are civilians and minor. Adding to Israel crimes, further restrictions on Gaza's aid assistance including medical supplies and killing of aid workers. ~~Further,~~ Apart from that, West so-called peace lovers were silent over complete <sup>later,</sup> scenario. When things change from bad to worse, the bold step was taken by S. Africa that filed a case in International court of justice and demanded for immediate ceasefire. However, continuous use of veto power by US that ~~for~~ further <sup>give</sup> ~~approved~~ green signal to <sup>Israel</sup> carry on more attacks and bombings.

Moreover, growing pressure from the people, for <sup>the</sup> West and Israel that led US to abstain ~~on~~ on UN SC ~~that~~ resolution of 25 March that called for immediate ceasefire.

This leads very bad impact for PM - Netanyahu who, already lost ~~to~~ his popularity and respect. The desperate move from Netanyahu to attack Iranian embassy in Damascus on April - 1 to divert ~~to~~ attention of people from Gaza to Iran. In retaliation to that, Iran also fired hundreds of drones and missiles which Israel claimed that these were handled before reaching on target. ~~Seemingly~~, <sup>Resultantly</sup> ~~Substantly~~, Nothing happened by this desperate move. First, US clearly ~~was~~ instructed Israel to prevent wider-war. Second, both the countries have tested each others power capability. ~~and~~ Third, The move was to drag US into war was failed.
