

Children in Pakistan

Globally, children under the age of 18 enjoy in a stimulating environment replete with opportunities to learn and grow.

Sadly, in Pakistan, children are vulnerable to different forms of violence, such as physical, psychological and sexual violence.

There are ~~other~~ ^{for example} issues that Pakistani children are facing, educational and health issues.

According to the Society for the Protection of the rights of the child, the number of child beggars in the urban areas stand at 1.5 million.

We are living in the society where children are not safe. They are traumatized because of physical violence.

Children are deprived of a childhood due to child labour, healthcare and lack of education and they become abusive individuals

for many reasons, such as certain painful experiences especially physical harassment that scar them for life. Parents must play a better role so that children are shielded

from being violated, exploited, neglected and abused.
