around the world. The Communication and connectivity with family or peers are not just the leverage of social media, but it provides online business opportunities, educational resources and learning, information and awareness or the political engagement and public participation. Additionally, not only advantages, it has disadvantages also. The many researchers argued that social media platforms are providing access knowledge to young generation by which, the youngsters are taking benefits. Not only knowledge, but it provides opportunities for every one to do online business and make their life luxury or earn money. Although, it has beneficial, yet, it is also have disadvantages which are harming to our new generation. It makes youth addictive towards social media platforms like tik tok, snapchat and whats app, it causes various health issues like eye site problems, anxiety and depration, not only these, but it also affects our time. By using more ~~to~~ social media becomes the time waster for adults, they are going away from their educations through these kinds of activities (using social media platforms). So, we need to use social media as a beneficial benefitor, not for affecting the life lives. For that, we have to aviode these kinds

kinds of plat-forms which are not useful for our new generation, which are mainly dependent or upon social media. Specialy, it is responsibility of ~~perant~~ parents.
