

# Brain Storming:

## Outline:

### 1- Introduction:

1.1 - Attention grabber

1.2 - Background knowledge

1.3 - Thesis statement: The major factors

that made world worse were include poverty, environment depletion, child labor and death penalty, are all decreasing. on the other hand, number of good thing increasing as compared to previous centuries, which make world blessed.

2- How world is getting better and blessed with bounties.

2.1 - Bad things <sup>are</sup> decreasing:

2.1.1 - Decreasing Poverty No.

- 2.1.2 - Decreasing many of deadliest diseases
- 2.1.3 - Decreasing Environmental Contaminants
- 2.1.4 - Controlling the rate of infant mortality
- 2.1.5 - Declining the number of battle deaths.
- 2.1.6 - Alliviating Legal Slavery

## - Things Getting Better:

- 2.2.1 - Increasing the Literacy rate:
- 2.2.2 - Global recognition of Women right
- 2.2.3 - Increasing electricity coverage
- 2.2.4 - More protection of Nature
- 2.2.5 - Higher the Immunization and vaccination

## 3 - Conclusion:

Thesis restated.

# Is the world getting better?

## Introduction:

In the past decade, global poverty has declined by over 10%, lifting millions out of extreme hardship. Similarly, there are plenty of instances and indicators reveal world is getting better. The significant improvement became reality with development of science, people awareness, recognition of rights and sacrifice of individual's interest for the interests of community. Development of science ~~lead~~ led to produce life saving drugs. On the other hand awareness make people to adopt practices that would save planet and thus future generation. Recognition and respect for human right also contributed in construction of hopeful world other wise it might face a chaos in society. Lastly, another concern generations to come was availability of food with limited food resources. The ample production of food is being produce in contemporary time. The decrease <sup>in</sup> ~~of~~ number of perils including poverty, infant mortality, small-pox, war mortality and ozone depletion and increase of in-blessings including literacy, democracy, woman rights, cancer survival shows world is getting better. This writing encompasses all these indicators ~~and~~ which are contributing in the way of progress.

# Conclusion:

To sum up, the world is getting better as all negatives which are plaguing humanity are reducing at much faster rate as compared to negatives. Like war, famines, epidemics, diseases and massive layoffs have substantially reduced in the second decade of 21st century. Mankind has gained skills and knowledge to deal the concerns pertaining to his existence and also ~~st~~ have started collaboration with those natural and man-made malaise. The betterness is evident by several indicators like control over poverty, disease and mortality and improvement in food production, literacy, liberty, education and immunization. By addressing contemporary catastrophes with a focus on collaboration, innovation, and compassion, the world could be improved for current and future generations.
