## Lack of Efficient Resources In Education Sector of Pakistan.

### Reasons

Pakistan is one of the countries with the lowest levels of education spending. However, the levels of teachers' salaries in the country has been identified at the core of education problems. (UNESCO's Global Education Monitoring)

The Report highlights, responsibility of government to provide universal quality education and stresses that accountability is indispensable to achieving this goal.

Almost all the new teachers are hired under temporary contract with 35 percent lower salaries, despite having good experience in teaching.

That's why, still many well-educated people do not take teaching career or as a proper <sup>career</sup> and one of the reasons are poor work condition and low salaries. And this problem can have negative side effects, widening inequality and damaging learning.
