facilities and out-dated curriculum is a major cause of higher education. Political interference disrupt the higher education in Pakistan. However, some remedies are curable to remove the ills in education system in Pakistan. Such as providing funds for education and improve technical education - Furthermore, promote professional teachers on merits. Higher education system promotes research culture in rural areas as well. Implement uniform education and access to skill training. No doubt these ills prevailing in education are curable by some remedies.

The institute of higher education can serve a bridge between the community and government. In fact higher education is the backbone of society. Infrastructure development needs to give high
