

Comprehension 5: CSS 2018, 1983

Q. Read the following passage carefully & answer the questions that follow: (20)

The third great defect of our civilization is that it does not know what to do with its knowledge. Science has given us powers fit for the gods, yet we use them like small children. For example, we do not know how to manage our machines. Machines were made to be man's servants; yet he has grown so dependent on them that they are in a fair way to become his master. Already most men spend most of their lives looking after and waiting upon machines. And the machines are very storm master. They must be fed with coal, and given petrol to drink, and oil to wash with, and they must be kept at the right temperature. And if they do not get their meals when they expect them, they grow sulky and refuse to work, or bust with rage, and blow up, and spread ruin and destruction all around them. So, we have to wait upon them very attentively and do all that we can to keep them in a good temper. Already we find it difficult either to work or play without the machines, and a time may come when they will rule you altogether, just as we rule the animals.

And this brings me to the point at which I asked, "What do we do with all the time which the machines have saved for us, and the new energy they have given us?" On the whole, it must be admitted, we do very little. For the most part we use our time and energy to make more and better machines; but more and better machines will only give us till more time and still more energy, and what are we do with them? The answer, I think, that we should try to become mere civilized. For machines themselves, and the power which the machines have given us, are not civilization but aids to civilization. But you will remember that we agreed at the beginning that being civilized meant making and linking beautiful things. Thinking freely, and living rightly and maintaining justice equally between man and man. Man has a better chance to do these things than he ever had before; he has more time, more energy, less to fear and less to fight against. If he will give his time and energy which his machines have won for him to making more beautiful things, to finding out more and more about the universe, to removing the causes of quarrels between nations, to discovering how to prevent poverty, then I think or civilization would undoubtedly be the greater, as it would be the most lasting that there has ever been.

(4 marks each)

Questions:

1. Instead of making machines our servants the author says they have become our masters. In what sense has this come about?
2. The use of machines has brought us more leisure and more energy. But the author says that this has been a curse rather than a blessing. Why?
3. What exactly is the meaning of 'civilization'? Do you agree with the author's views?
4. 'Making more beautiful things' - What does this expression mean? Make a list of the beautiful things that you would like to make and how you would make them?
5. Mention some plans you may have to prevent poverty in the world. Who would receive your most particular attention, and why?

The author says, the machines have become our masters because ~~we~~ we are unconditionally depending on mechanics. They spend most of their time in the maintenance of machines because it does not perform well without proper maintenance. It needs proper fuel, cleaning, normal temperature to work. Rather than independent work, man has become a servant of machines.

Questioning

The mechanics has brought us more luxuries and much energy in man's life. But it's also a reality that man spends a lot of time in the invention and maintenance of machines. A little mistake or a cause has led to destruction due to a fault in machines. Therefore, the author asks it's a curse rather than a blessing.

Question No 3

Civilization means to link between various things of society. It is also makes a relationship between humanity. Linkage between humans form society and its culture.

Question No 4

To making linkage between beautiful things means build a relation in society. It is process of making justice in society, gives human right to live freely independently and spend life with his own will.

Question No 5

Poverty ^{can be} control through better policy making. Reduce the expenditure on welfare

thinks like space mission instead
of these payhead on this planet
problems. Provide Resources everyone
it is the duty of policy
makers ~~to~~ implement it
accurately.
