## Title:; Methods in the Children Education.

There are different schools of thoughts, based on freedom in children education. Some of them are in favour of free will to be given to the children, that there should be <sup>no</sup> command like animals on children about to attain knowledge. Many of them are against them that without command the children do not attain education on their own will because the children do not have the capability to differentiate in right and wrong. In this modern world the children should be equipped with modern technology and to give them the education of science and technology.
