

Essay

Artificial Intelligence: The Death of Creativity

Thesis Statement

The human being is prior to all creatures, this priority is due to the power and ability of creativity which is threatened due to Artificial intelligence

Introduction

The man is trying to achieve perfection in their lives which came in the form of Artificial Intelligence (AI). AI is now controlling human brain, in result the death of creativity which effect largely on Education field, Medical field, Research field, Economic field and IT (Information Technology) sector also. The main difference between man and other creature is that, its creativity. Due to which man is superior to all. The latest tool, AI, is threat to this creativity.

Body paragraph

1) Artificial intelligence and Education sector

- i) Effects on: student learning system
 - ii) Effects on Research work
 - iii) Online learning and education
 - iv) AI and Student creativity
- 2) AI and Medical field.
- i) Surgical sector and AI
 - ii) RIT (radiography and imaging technology) and AI
 - iii) Diagnostic sector and AI
- 3) Economic field and AI
- i) Manual work and AI
 - ii) Man service (as labour) and AI
 - iii) Robot at the position of man
- 4) Information Technology sector
- i) Computer operator work and AI
 - ii) Manual shifting to AI control
- 5) Research fields and AI
- i) Discoveries and inventions with relation to AI
 - ii) Death of creativity
- 6) Conclusion:

Power of Propaganda in Muslim world

Introduction:-

Muslim rise in the world

Downfall of muslim

Propaganda against muslim

Thesis statement:-

The two religious poles have been established in the world; However, the propaganda of great powers, against muslims, have multidimensional effects on muslims image in the world.

Body paragraph:-

- 1) The war of independence ⁽¹⁸⁵⁷⁾ and muslim image
 - a) A hypocritical image of muslim to British
 - b) Suppression of muslims power
 - c) Political, social and economic effects
- 2) The WWI and WWII: Separation of powers
 - a) Downfall of Ottoman Empire
 - b) Separation in Subcontinent
 - c) Rise of china and US empowerment
- 3) 9/11 impacts on muslim world

Conclusion:

Climate change is most critical issue facing the world today.

Introduction:

Our environment have the ability of self sustainable; but unfortunately the natural cycle disturbed by human activities, resulting in climate change. Many other issues linked with climate change; For example Global warming, Green house effect, melting of glaciers, Floods, Deforestation resulting in soil erosion and water cycle disturbance and many other devastated issues. This climate change problem is globally spread. The only solution to this problem is Control of human activities which interrupting the natural cycle.

Thesis statement:

The climate change is most critical issue facing the world resulting in many problems which leading toward disaster. The survival is completely threatend unless we do not take any action to mitigate all the causes, which leading the world toward destruction.

Outline:

1) The life before industrial revolution

2) Reason of climate change

i) Industrial revolution

ii) Human being development

iii) Growth exploitation

iv) Urbanization

v) Deforestation

vi) Burning of fossil fuel

3) Factors leading toward climate change

i) Pollution

i - Air pollution

ii - water pollution

iii - Soil pollution

ii) Global warming

iii) Green house gas emission

4) Effects of climate change

i) Disturbed water, carbon cycle

ii) Loss of agricultural yield

iii) effect on country's economy

iv) Smog

vi) Global warming

vii) Rise in sea level

viii) Health problems

5) How to control and mitigate

6) conclusion.
