Precis [CSS 2016]

"War and it's Prevention"

It has been observed through research that war has been one of the main causes of end of civilizations. War is a hideous evil which if it gets a hold of society then it does not leave easily. Violence and disruption that comes out of this weighs more than what is achieved. War has a tendency to slowly destruct nature, man power, life and peace. It starts to eat the society from inside, just like a malignant tissue. Efforts and contributions have been made in past to avoid such circumstances. Individuals as citizens have the opportunity to be conscious of their actions by not participating in wars or encouraging their States. Similarly, cooperation and unity between governments to prevent root causes of war impast is another successful way ~~to maintain peace~~ of prevention.
