"The Importance of Education in Pakistan's development"

Education played crucial role for making civilized nations. As Sir Siyyad Ahmad Khan said, "Educate, Educate, and Educate" - because he knew the importance of Education. Developing nations like, Pakistan, has been facing several hurdles ~~in~~ since its independence. Education works like crystal for dealing those problems. Education can stabilize the unrest among people, minimize unemployment and violence in the society, solve socio-political issues and enhance the country's GDP Growth and attract the investment. Firstly, Education can fix the political unrest among people. Educated vote is quality vote and choosing the right leader, who works for our nation is most important decision. This decision ~~&~~ should only based on educated people so that, country can grow. In addition, Education is not only based upon academics but IT education and self defense education is also very important. World is moving toward AI, so acquiring technological knowledge could lead to employment. Furthermore, Crime and violence towards women can distort the State's image, so self defense education can decrease the crime rates and bring prosperity within country. Education can solve socio-political issues and decrease chaos and protests in Pakistan. Hence, It is proved that Education is the influencing tool, which bring the country towards the development.
