

Essay:

Gender Equality is a myth!

Out-line:

1- Introduction:

Thesis Statement:

No, gender equality is not a myth, it is a reality. Gender Equality is responsible for equalness among all genders and it is essential for the growth, prosperity and progress of every society.

2- How 'gender Equality' is not a myth:

- i) Gender is socially constructed.
- ii) All genders have equal rights in law and Constitution.
- iii) All genders are also humans.
- iv) Every religion gives rights to all genders.

3- How 'gender Equality' is essential for the growth, progress and prosperity of the society:

- i) Gender equality built the confidence among the people for the society.
- ii) Equal-ness among all genders promotes the positive image of the society.

- iii) Developed nations are examples of growth and prosperity due to equality among genders.
- iv) It is responsibility of the society to provide safe pathway for all genders.
- v) Gender Equality is responsible for better economy of the country.
- vi) Contribution of all genders in political and strategic fields of the country.

4. What are the disadvantages of unequalness among all genders in a state:

- i) Unequalness among all genders creates chaos in the society.
- ii) A state lose its potential and reputation due to no gender equality.
- iii) Gender unequalness is responsible for De-merits in the state.
- iv) Many developing state are struggling for development just because of unequal among all genders.
- v) Gender bised society do not grow properly.

The World, is the house of many living things but humans are most superior and very beautiful creature of God on the planet. God created all the humans equal and gave them equal rights but after the creation men ~~hobbed~~ held the system of the world and started the rule on world. He suppressed all other genders with his ability of power and not provided equal rights among all genders. Men spread a slogan world-wide 'Gender Equality is a myth' just to save their hegemony on the globe, but it is not a reality, gender equality is not a myth because, when creator gave equal rights to all gender or humans why did not men give? It is self-made slogan and has no reality because gender equality is responsible for growth, prosperity, and progress of every society. All genders are also humans and all laws and constitutions give rights to all genders. It is positive move of all developed nations they give equal rights to all genders because they understand the reality of everything and they know very well equality among all genders promotes the positive image of the society.

Firstly, people make question to the society, how gender equality is not a myth? Because gender is socially constructed, it is the responsibility of the society what a society give feeling to a person, and what a person feel, like that he/she acts. A society form a gender when a person acts

like its given gender then society exploits his/her rights. Society should recognize the gender and give its all rights. There are 72 genders on the world male and female are also included. God created men and women but other 72 genders take a part due to behaviours of the society, it means society is responsible for gender creations and it is responsibility for the society to own the genders.

Secondly, all genders have equal rights in all laws and constitutions. Article 26 and 27 of the constitutions of Pakistan 'provide equal access to public places and equality of employment in public and private sectors for equal male, female and transgender.' In Pakistan government give the right of vote and give national identity card (NIC) to transgenders and they can mention their gender on their own choice. On the other hand The Charter of United Nations on gender equality Article 8 and 10 follows that 'there shall be no restrictions on the eligibility of male and female to participate in every capacity and under conditions of equality in its principal subsidiary organs.' The efforts of the United Nations and other countries are proves of importance of gender equality because nations know this truth without gender equality there is no chance of growth. Denmark: Come out of top countries in gender equality and Denmark is

3
a superlly growing state on the world-
map. it is hard reality to understand
the ~~past~~ Patriorhial Society other genders
have further rights and they are also
humans and they have a right to live
in the world with their own decisions.

"We shouldn't be afraid word
Feminist. Men and Women should
use it to describe themselves."

Justin Trudeau
P.M of Canada.

World top leaders and Organizations
accept this reality because they underst-
and all genders are also humans and
they also understand the prosperity of the
world is possible just due^{to} casualness
among genders. When all humans are children
of Adam and Eve then how some out
of them can superior and inferior. Nature
cannot break its laws and ~~their~~ its
laws are, no one can be exploited or
disturbed until and unless external force
do not interfere in its matter. There
is role of surroundings and environ-
ment which force the male to rule
on other genders, and it is hard reality,
~~not~~ a single ruler will want to
lose his power.

Therefore, every religion give rights to all
genders. Islam, Christianity and Judaism
have equal rights for men, women
and transgender. ALLAH (SWT) says in
Al-Quran "Do not hurt any one, everyone

are creation of ALLAH." In another verse ALLAH (SWT) says "Do not kill right of someone". In surah Nisa ALLAH (SWT) present the rights of women. Like that in Christianity ALLAH defended the mother of Hazrat Issa Maryam. It means ALLAH (SWT) gives the lesson of equality among all genders. On the other hand last prophet (SAW) Muhammad (SAW) said, "No one has superiority on others." In his last address, it gives the sense of equality. Last Prophet (SAW) helped ~~that~~ ^{his} wives in their house works, he cleared his house and clothes, it is the best example of gender equality.

However, gender equality is essential for the growth progress and prosperity of the society, President of Angelica Fuentes foundation said,

"Gender parity is not just good for women - it's good for societies."

When all gender feel comfortable and work collaboratively for society then society moves upward rapidly. It is universal truth 'Unity is strength' it means when a society unites their people against every problem then problem looks like nothing. But is possible just because of equality among genders. Every person do not achieve every goal but many goals are achieved by many persons. It is not a reality, a woman is not strong, a woman can not

face pressure, now world have many female leaders, many female soldiers it is just a mentality about women. She can do anything and achieve every goal.

In the same way gender equality build the confidence among people of the society. if there is some exploitation in any society there is no law and order and when law and order is removed from the society there is anarchy. Suppression of anyone build negative structure of society in people's mind then people lose confidence about their society and commits crimes because they know there is no law and order in the society. But on the contrary when society maintain equality among people and do not allow any one to spill other's rights then a society build more confidence among people and people work altogether without any discrimination and society grow up fastly.

"Freedom cannot be achieved unless women have been emancipated from all kinds of oppression."

Nelson Mandela.

Emancipation of women from all kind of oppression means women is facing some type of pressure on her self by male or other gender. But equalness among all genders promotes the positive image of the society. Number of states which are example of gender's exploitation

They have a trend in their culture to beat women and do not provide their fundamental rights, They have trends to exploit their rights. In many states fathers and brothers kill their daughters and sisters due to their affairs. They do not take their views about their marriages. They do not allow them to take education. They do not give their property rights but in international community those states have no importance. It is reality when person do not respect others rights then other people do not give respect to him. International organizations worked very hard for genders equality then genders are getting some respect from society nowadays. It is a pivotal point for every state to recognize the importance of all genders then a state will gain importance on world forum.

Developed nations are best examples of growth and prosperity due to equality among all genders. Now, According to world sex ratio 2024 statistics Times.com 4.06 billion female population representing 49.72% of the world population and developed nations has recognize this reality and make environment friendly for both genders to gain more advantage because more strength gives more facility and generating their double revenue with collaboration of all genders. It is lesson for developing and under development

7

states which do not give importance to their genders and make gender biased policies.

"If women are expected to do the same work as men, we must teach them the same things."

Plato - Greek
Philosopher.

It is responsibility of the society to provide safe pathways for all genders for proper growth of the society. A specific gender based society do not bear the existence of other genders. News reports number of cases daily. Rapes, harassment cases, commercial exploitation are those weapons which are used by society for other genders. Developed nations formed strict laws and formed law enforcement agencies to avoid these such issues. Malala Yousafzai was a girl in North Waziristan who step up against bad rules of her society they then society tried to kill her. To provide safe paths and proper education to people about other gender and to give proper environment for work and show their skills are responsibilities of a society for growth and prosperity.

It is time to understand the estimated that the gender gap closing could give the global economy a 7 trillion USD boost. It means gender equality is responsible for better economy of the world. In 2023 approximately 1.4 billion employees were female who contributed in the GDP of the world. Gender equalness creates revenue for the world how it can be myth. Without 72 genders contribution a male cannot feed the world. ~~Lonely~~ contribution of others is necessary. A woman can change the nature of the man and change his bad habits so she also can change the world with her hard work and determination.

"if one man can destroy everything, why can't one girl change it."

Malela Yousafzai.

A woman can achieve gold medals number of female athletes winning medals in games. many females achieved nobel prizes. world have many female leaders and generals they have major contribution in the progress of the world. They are not just a sex toy they more other potentials. A society just has very narrow minded approach female abilities. During birth if a woman can bear sever pain of labor which is similar to hundred⁺ bones break at same time then she can do everything. which societies give them feelings of power then there the women perform like men.

But to the contrary, there are lot of disadvantages of unequalness among all genders. When a person do not get his/her proper rights then he/she raise their voice and outburst their feelings its best examples are feminist movements in the world which gave the voice to women and provide proper forum for their rights. It started from west and with the passage of time it covered the whole world. Feminist movement's leaders presented its more organized and educated versions against male dominant society. After this world announced 8 March as world feminist day. On that day females expressed their feelings about society and presents their problems but this acts like very doubtful and seems like hanging pandulum on the state which can create any drama between genders at any time. But all of this just due to society injustice with other genders. One wrong move makes lot of disturbance among people and it is looking. On confrontation from both genders makes hated situations and this hate have has reach at home level at also that level where men and women live together. Now it is time to understand and try to reunite thing which were destroyed by us. Every action has its reaction and now is the time of reaction and reaction can be more dangerous so its time cover up the flying dangers.

At world level a different type of anarchy is waiting for us. Number of cases were reported of murders of male and females by opposite genders. Day by day world moving towards more deep problems everyone is aware now about their rights and it is time to understand their feeling. On the regular base protests of Gays, Lesbians, Homosexuals, Bisexuals etc giving the potential to a cold war. States facing international pressure on this situation because world show the feelings of other genders which burning in them due external pressure lot of countries making policies for favour of all genders to avoid the world serious chaos. This seriousness of the world and opposite genders at this time gives clear message that gender equality is not a myth. US trying to start a world wide development program is known as B3W the main agenda of the program is to work on gender equality world wide and the worth of this program is 40 billion USD and world organizations announcing funds to developing states to ensure gender equality in that states. After this seriousness of world about this metter gives clear sense that gender equality is not a myth it is a reality and now the time to understand this reality.

In the view of all ~~debate~~ debate the result, which is extracted, Gender equality is not a myth, is a reality and has great potential to move towards growth and prosperity. It is time ^{of world} to understand the importance of all genders and all genders are also humans. When every religion every law give rights to all genders it is responsibility of society or state to provide equal rights to all genders. All genders and people of the state are responsible for state's progress and growth and all developed nations take advantage of people's strength. Satisfaction of all genders on their state promotes positive status of state at world level. It is reality that gender biased society do not grow properly and lose its image on international level. Unequal-ness among all genders create chaos in the society and after observing the current situation about gender equality it is time to understand the importance of gender equality and need to understand that gender equality is not a myth and state should take it serious.
