Introduction.

A famous statement by the prime minister of New Zealand Rob Muldon in the 1980s commenting about the increasing exodus of New Zealanders leaving the country to work in Australia was "New Zealanders who leave for Australia raise IQ of both countries". The brain drain is the movement of highly skilled and educated people to a country where they can work in better condition and earn more money. The main cause of the brain drain in any country is the low infrastructure and unfortunately Pakistan has very low political, economic and social infrastructure.

Unemployment, poverty, Inflation, Low Living Standard, poor education, Limited access to health care, political Instability, Wrong commitments of Government are the major cause of brain drain. But the brain drain also face dangerous consequence such as depletion of human capitals, deminish of Quality services, loss of Revenues, Reduction of professionals and skilled workers are all the consequences faced after brain drain. Government and society both are responsible for brain drain by working on their all weak point we ~~will~~ ^{should} stop brain drain.
