Date: _____

Global Warming and our Preparation to Counter it.

1 Introduction

- a) What is Global Warming?
- b) Measures to Counter Global Warming.
- c) Thesis Statement.

2 Pakistan's Preparation to Counter Global Warming:

- a) To Enhance Global Forest Cover
 - i) Billion Tree Tsunami
 - ii) Green Growth Strategy 2024
- b) Promotion of Sustainable Transport
- c) Promotion of Renewable Energy Sources:
 - i) Government Solarization Scheme
 - ii) Ban on Coal
 - iii) Climate Awareness Education

3 Obstacles to Counter Global Warming

- a) Deforestation and Lack of Plant Nurturing Knowledge
- b) Expensive Electricity
- c) Poverty as a Hurdle for Acquiring Electric Vehicles

d) Lack of Infrastructure

4 Conclusion

Global Warming is, a critical issue of 21st century, an increase in the average global temperature of earth's surface. Like other nations, Pakistan is also facing this pressing issue. Owing to increased Green house gases, population explosion, Deforestation, Terrorism but Pakistan has started implementation of several of its policies such as enhancing forest cover, promotion of sustainable transport and electric vehicles, promotion of renewable energy sources through solarization and banning coal, and climate awareness education. Though, there are several hurdles as well. In the coming paragraphs, we discuss Pakistan's preparation to mitigate Global Warming and hurdles in its way are discussed.
