Conclusion:

The Essay

Brain drain is emigration of skilled and talented people from developing countries to developed countries for economic gains, healthy lifestyle and personal satisfaction. Brain drain has become a major issue of the world but Pakistan is facing this badly. Many young and talented people of Pakistan are leaving the country because of major causes related to economic crisis, political turmoil, social problem, security concerns, terrorism and medical problem. These causes have badly impacted the country in respect of loss of human capital, loss of talented people, social side effects, health concerns, increase of educational bills and low growth & development. However, brain drain is the major concern of Ukraine today but in 2024
