Day:_ chergy acts like All the examonic, portical cool al growth Country depends on it nergy where acts dile energy Crisis country and Stops Socially, politically and above al economically. It is Saddenning Pakistian, being no com Countries those Sector Stark esperticity orice, so lack 1055 el'ectricit transmission and much more These factor only results has delal - teropheray foreheiderdy economy of begin with, energy Consider ountry backbone of a transforms Important to son a Country. It 3 nation by empoyering its economic Stability. The so the at arc Self-Sufficient have a and in energy Sate, For instance, Australia, Self sufficient in energy, has reacted lists trillion Gross Domestic Roduction GDP The 6 energy has made many program. It the importance of Country W.

manipulated the minds of innount people

Day:_ the country has to wirk hard to construct Several dams to meet its energy requirements 1 Moreover, one of the other reason for T the Shortfall is electricity theft or Konda System. In South Asar Alkiston is on the top of the list. This thep results in bising amount to billions of rupees annibally Dinores People temper whe meter reading, sometime they Steal elementy directly by illegally tapping on distribution line. This will apply should be signed, otherwis it will couses wry disastourous effects, abouting further shortful Next to it, is one of the major of power loss during the transmission and distribution of electricity According to National Electric Power Regulatory Authority NEPRA A annual Report 2 92, "The Nex U transmission and distribution dosses 1 for the year 2021-29 were 18.4571. of the total energy derivered to the system" The transmission lipes are really outdatedly outdated, even majority of them are expired befero 2000 or 2010. The Couse xpire 1 and outdated line resultantly highest doss electricity during transmission Fuethur, the existing dom ingras--trudure is expiring, resulting in less electricity production. The Life times have completed their differences and the

Day:_ Date: growing energy demands particularly for power generation. According to current Prime Minister" Pakistan produces gover the most expensive electricity in the English this expen--Sive engry not pay the Bill Causes some the people in form of high bills a People do not July de to awhich circular be debt increase and wall in charte I of energy Moving towards impacts, the country electricity, which has created many problems for the nation it has barred the count-- ry's socioe conomic progress by paralysing the local injustry that run on electrical According to British Broad siting contre (BBL) Pakistan's load- hodding hours exceed to & hours daily load hedding of rectricity bresne a termoit for people; unimately, It has affected their social life Next to it, the textile industry, is Consider & dyssidered of Pakistan's dwindling economy is also facing a hard time due to the power storage the grand to the Textile mills, most mill owners have

The government has failed to produce

Shut down their factorics due to freque -ent pour cut. According to Pakistan) exports Bureau in 2022, Pakistan has exported the least textile compared to last ten years. The massive revenue that

local industry, will be come unemployed

Day:__ Date:____ So the government must address the ISUR before it worsen Similarly, the foreign Direct Investment FDI drops to a surging level yearly. According to the Division of Foreign Ministry Pakistan has not extend FDI projects for the last three years For a develoting country. FDI parayents is not just a more coss-bider Investment, bringing prevous & venue, but & matter of life and death for the country's Slacking economy. Besides the need for more investment by foreign investors, the existing ones are trying to close their Indicates the Shipt of foreign investors towards other Asia Countries with Cheap labour and electricity. The countries decline in the FDIs carrob millions of people of a bright future All hope is not lost, a every tunnel has light to its and. The country can overcome the Issue by implementing the following recommendations. First of all, building a rubust political consensus among policy-maker over the of the energy first step towned gather rid of the situation
However, the political parties praying the national card over the issue of Kalabaja Dam must be trialled in a court of law as they are proving to be a hurale in the integrity

b	household Assist appliances that consume less
0	electricity. For incline 12 wall energy applianted
)	consume less dectricity: therefore, such appliance
	Should be encouraged.
6	Last, proper distribution michanism
•	must be introlved nationwide. A considerable
6	amount of elegicity is wasted as line losses
5	Moreover, the government S. ad Conduct regular
•	inspection to identify and prosecule electricity
6	thiseves. Government should imposs strict penaltics,
	Including heavy plas and imprisonment
	for electricity theft. In a mutshell, Pakistan is impacted by the
3	energy crisis due to services cases
	In a nutskell, Pakietan halla hortage
>	of energy the issues has been present sin the
3	beginning, but it has remained vanitived . Hovever
	with Pevery passing year, it keeps graving. The
	Several caused of this Crais include, lack
	of political Consenses, Shortage of dams, dack
	of attention towards renewable energy sorces
	However some secon idations can make the country sold cuts in power, like creating
	new damy building political consensus, Shifting
2	to renowable energy soules, and establishing
	to renewable energy sould, and establishing a robust power distribution system pree from
	theft and Coxxuption
9
