

## PART-II

**Q. 2. Write a précis of the following passage and also suggest a suitable title: (20)**

All the evils in this world are brought about by the persons who are always up and doing, but do not know when they ought to be up nor what they ought to be doing. The devil, I take it, is still the busiest creature in the universe, and I can quite imagine him denouncing laziness and becoming angry at the smallest waste of time. In his kingdom, I will wager, nobody is allowed to do nothing, not even for a single afternoon. The world, we all freely admit, is in a muddle but I for one do not think that it is laziness that has brought it to such a pass. It is not the active virtues that it lacks but the passive ones; it is capable of anything but kindness and a little steady thought. There is still plenty of energy in the world (there never were more fussy people about), but most of it is simply misdirected. If, for example, in July 1914, when there was some capital idling weather, everybody, emperors, Kings, arch dukes, statesmen, generals, journalists, had been suddenly smitten with an intense desire to do nothing, just to hang about in the sunshine and consume tobacco, then we should all have been much better off than we are now. But no, the doctrine of the strenuous life still went unchallenged; there must be no time wasted; something must be done. Again, suppose our statesmen, instead of rushing off to Versailles with a bundle of ill-digested notions and great deal of energy to dissipate had all taken a fortnight off, away from all correspondence and interviews and what not, and had simply lounged about on some hillside or other apparently doing nothing for the first time in their energetic lives, then they might have gone to their so-called peace conference and come away again with their reputations still unsoiled and the affairs of the world in good trim. Even at the present time, if half of the politicians in Europe would relinquish the notion that laziness is crime and go away and do nothing for a little space, we should certainly gain by it. Other examples come crowding into mind. Thus, every now and then, certain religious sects hold conferences; but though there are evils abroad that are mountains high, though the fate of civilization is still doubtful, the members who attend these conferences spend their time condemning the length of ladies' skirts and the noisiness of dance bands. They would all be better employed lying flat on their backs somewhere, staring at the sky and recovering their mental health.

# Laziness is not a Crime

CSS 2017

Those who stay busy without knowing their actual purpose, have brought all the evils in this world. The world is in chaos, not as a result of laziness but due to the lack of kindness and steady thoughts. For instance, in July 1914, if all statesmen had relaxed when the weather was suitable for it, the world would have been much better off now. Similarly, if before going to Versailles, all the statesmen had taken a day off from interviews and meetings, they could have come out of the conference with the better results for the world. Even today it is achievable, if the concept of laziness is a crime is discarded by the European politicians. Thus, instead of arguing on unnecessary topics in conferences arranged by religious sects, it would be beneficial for people to take some time to recover their mental health.

**Q. 2. Write a précis of the following passage in about 120 words and also suggest a suitable title: (20)**

It is in the temperate countries of northern Europe that the beneficial effects of cold are most manifest. A cold climate seems to stimulate energy by acting as an obstacle. In the face of an insuperable obstacle our energies are numbed by despair; the total absence of obstacles, on the other hand leaves no room for the exercise and training of energy; but a struggle against difficulties that we have a fair hope of over-coming, calls into active operation all our powers. In like manner, while intense cold numbs human energies, and a hot climate affords little motive for exertion, moderate cold seems to have a bracing effect on the human race. In a moderately cold climate man is engaged in an arduous, but no hopeless struggles and with the inclemency of the weather. He has to build strong houses and procure thick clothes to keep himself warm. To supply fuel for his fires, he must hew down trees and dig coal out of the earth. In the open air, unless he moves quickly, he will suffer pain from the biting wind. Finally, in order to replenish the expenditure of bodily tissue caused by his necessary exertions, he has to procure for himself plenty of nourishing food.

Quite different is the lot of man in the tropics. In the neighbourhood of the equator there is little need of clothes or fire, and it is possible with perfect comfort and no danger to health, to pass the livelong day stretched out on the bare ground beneath the shade of a tree. A very little fruit or vegetable food is required to sustain life under such circumstances, and that little can be obtained without much exertion from the bounteous earth.

We may recognize must the same difference between ourselves at different seasons of the year, as there is between human nature in the tropics and in temperate climes. In hot weather we are generally languid and inclined to take life easily; but when the cold season comes, we find that we are more inclined to vigorous exertion of our minds and bodies.

# Beneficial Effects of Cold

CSS  
2018

In Northern Europe, temperate countries takes the most advantage of the cold. It provides a reason to channelize the energy, by acting as an obstacle. Intense cold or a hot climate do not motivate much to utilize the energy, but moderate cold is ideal to exercise it. In moderate cold, man is engaged in building houses, cutting woods to fuel fire and digging out coal out of earth. Moreover, he has to consume nutritious food to regain the bodily tissues ~~that~~ damaged by excessive work. In contrast, man in tropics is quite different. Neither he needs survival skills nor he require nourishing food. Hot weather generally makes life easier, but the cold demands activity of our mind and body.
