

Must develop proper understanding
of the topic before attempting it

Politics is perhaps the only profession
for which no preparation is
thought necessary.

(1) Introduction

Faulty understanding of the topic

Thesis statement:

No, there are also many
other professions for which no preparation
is ~~thought~~ necessary. Because
politicians are exposed in front of
public all the time. And remaining
professions mostly do not discuss
in gatherings. Hence, politics is
not single profession which is taken
lightly by people.

~~(2) Politics is single profession
which is undermined~~

(3) How Politics is the only profession
which is taken lightly (thesis)

(3a) Mostly politicians do not learn public speaking

(3b) Politicians do not get classes to become a politician

(3c) Politicians learn with the ~~passage~~ passage of time with their mistakes

(4) How politics is not the only profession which is taken lightly (Anti-thesis)

(4a) Teachers also do not learn public speaking

(4b) Home chefs also do not get classes

(4c) Entrepreneurs also learn with time by mistakes

Date: ___ / ___ / 20___

Day: _____

(5) There are many professions
which are undermined

(5a) Teachers and politicians
both need to learn public speaking

(5b) Home chefs and politicians
should get classes

(5c) Entrepreneurs and politicians
should learn from a mentor,
not from mistakes

(6) Conclusion

"A ruler who succeeds is the one who learned all the tactics" (The Prince by Machiavelli). No, there are also other professions for which no preparation is thought necessary. Because politicians are exposed in front of public everytime. And remaining professions mostly do not discuss in gatherings. Hence, Politics is not single profession which is taken lightly by people. Politics is considered single profession which is undermined by some people. Because politicians do not learn public speaking mostly. Further they do not get classes. That's why they learn from their mistakes. On the other hand, some people think politics is not the only profession which is undermined. Similarly, teachers do not learn public speaking. Additionally home chefs do not get classes. And entrepreneurs also learn from mistakes. To conclude, there are many professions which are

undermined. Teachers and politicians both need to learn public speaking.

In Addition, Home chefs and politicians should get classes. And entrepreneurs and politicians should learn from a mentor not from mistakes.

It is considered that Politics is the single profession which is undermined. It is evident from the condition of Pakistan. Pakistan have got endless un-educated politicians. People did not prefer to learn politics. "Politics is the art that should must be learned." (Art of the War by Sun Tzu) Hence, politics should be considered as a serious profession.

Politics is considered as the only profession which is not worthy of preparation. People take it lightly. And jump into the election campaign without any kind of preparation. "An unskilled ruler

will be use as a doormat by foreign powers." (The Prince by Machiavelli) So, a politician should make consious efforts to excel in field.

Firstly, many politicians lack the art of public speaking. This makes their career un-worthy. They fail to motivate and impress the public by their ideologies. They do not maintain good relation with public due to lack of public speaking. "A politician know how to take the confidence of ordinary people." (The Prince by Machiavelli) That's why public speaking is fundamental art that is missing in politicians.

Secondly, politicians do not sit and get formal classes. Although this profession needs a wide range of knowledg. That will help them to become excellent politicians. "I have learned

all the tactics of politics and war from my father Bostagul Ghazi. And I will deliver this to my sons. In this way empire will become strong." (Osman Bey, founder of Ottoman Empire) Hence, politicians need to get proper political education before starting the career.

Thirdly, politicians learn from their mistakes. As in Pakistan, Nawaz Sharif to Imran Khan all learned from their mistakes. They all got the punishment to oppose the establishment. They had to face dare circumstances to confront establishment. "A ruler should acknowledge the key fundamentals of politics." (The Prince by Machiavelli) So, it is dangerous to learn from one's own mistake.

On the other hand, there is a group who oppose the above mentioned idea. They think

politics is not the only profession which is taken lightly. There are many other professions which are also taken lightly. It is human nature to under value the importance of hard work in any field. He tries to find shortcuts. "Most humans are following realism, it is difficult to tackle them without deep understanding of realism. So politicians need to learn it." (Pakki Sharma, Indian journalist) Therefore, humans should not take any profession lightly.

First of all, the teaching profession is also undermined. Teachers need to excel in public speaking. It is necessary to maintain good communication and exchange of ideas between teacher and students. "70-80% teachers lack the teaching skills, and unable satisfy the needs of students in Pakistan." (Report published by UNO) Therefore it is proved that

teaching profession is undermined.

Furthermore, home chefs also do not get classes. In Pakistan mostly home learn by themselves. As mothers did not take cooking class. They just learned by themselves. "90% home chefs in Pakistan are not trained." (Report published by Forex) As a result the profession of home chefs is also taken lightly by people.

Last but not least, Entrepreneurs are also lightly taken. They make mistakes in the careers. One and other mistake adds experience to their learning book. That is not a safest way to do a business. In this way they may loss millions of investment. "90-95% businesses in Pakistan fail to flourish only 5% startups develop into developed business due to lack of Entrepreneurship skills." (E-commerce by Sunny Ali) So it is proved Entrepreneurs also make mistakes

throughout the journey of career.

It is evident that there are many professions which are undermined. There is a big list of such professions. But teachers, home chefs and entrepreneurs are notable here. "There are many professions in which people enter un-skilled. At the end the condition of Pakistan is deteriorating."

(express Tribune.com. by M. Imtiaz, 2014)

So, it is important to take proper education before entering a profession.

Moreover, teachers and politicians both need to learn public speaking. This skill is helpful in making a bridge between two parties. From teacher to students and politicians to public this is most required skill. It is not possible to get the desired results without learning the art of public speaking.

"People who know the importance

of art of public speaking excel in every field of life." (Art of the War by Sun Tze) As a result, art of public speaking should mandatory to learn before starting any career.

Furthermore, home chefs and politicians falls into the same category. Both jumped into the pool without any preparation. Home chefs do not learn the skill of cooking in the formal classes. Similarly, politicians do not take any kind of education. All the professions are full of challenges. Learning is the key to become successful in any profession." (Javed Chudhry, Book: zero point) At the last it is fundamental to get formal classes before starting a career.

To the final note, both entrepreneurs and politicians should learn from a mentor. It will help them to make unlimited

mistakes in the career. When people make a mentor and learn from him. He guides from zero to the possible last level. It is insane take mistakes as a mentor. "Wise people learn from others mistakes. fools learn from their own mistakes."

(Hakeem Luqman) To conclude, people should make right decision to learn about a profession from a mentors

To sum up, some people are advocate of politics is the only profession for which no preparation is needed. While other think there are many other professions which are undervalued.

This list includes cooks, teachers and entrepreneurs. Every profession demands different kind of skill set. And people should learn these skills from a mentor. "All professions are equally respectable and need proper guidance." (Imam Ali, Nehjul-Bilagh)
