

## Five Para mini Essay

### Negative effects of social media

Social media has revolutionized the world. Through social media the human beings communicate and interact and share information with each other. The social media digitalized the society. However, there are some negative effects of social media some of them are the addiction towards the social media sites, consuming more time and eye sight problems.

The social media applications are an addictive in nature. It attracts the users towards itself and once you use of these applications can make you addictive. The social media sites have has attractive contents and the human nature is addicted towards it easily.

Secondly, the social media ~~has~~ consuming more time. Once opening of a social media site can not let a person to close it. The scrolling habit on social media sites are consuming more of the time. The use of these sites disturbs the daily routine of the users.

The most ~~important~~ negative impact of the use of social media is that it causes the eye sight problems in the people. The use of mobile phones, laptops etc screen directly damage the eye sight of the people. Resultantly, which ~~is~~ affect the life of human beings badly. The eye sight is ~~an~~ important ~~of~~ life and which is directly effected by the use of

reen and ~~once~~ eye sight problem  
, cannot be recovered as there o  
sing glasses, ~~lenses~~ etc.

~~at the other side~~

social media digitalized the wo  
makes the people ~~live~~ easy but,  
negatively ~~about~~ the daily life  
and causes health issues in  
beings.
