Pakistan :.

Which is categorised

Pakistan is a country which is caiagorize in the developing states. Pakistan is developing day by day but ofcourse there are some lacks in different department. For instance beurocracy, tourisim sector, agriculture and many more. Pakistan may prosper more fastly if we work on our different departments in which we see lack; for insiance we may work on agriculture, tourisim sector, advance teenology through which we advance or up-grade our departments by insiallation of indusines through which thier would be a job facilities and also genvaie a great revenue. it may also plays a key role in the economic growth and GDP. There should be encouragement of small and comer-cial type of business through which there woofld be a creation of jobs and help for the betterment of economic growth. It is a fact that agriculture department has a key role in the prosperity of Pakistan because 40 to 50% of our economy is dependent on the Agriculture sector, but there are some lacks in Agriculture department because it seems that *Good in basic* in Pakistan the Agriculture department is working on old methods. Still in our villages

There is a lack of

there is a lack of machinery and almost no use of technology, but if we work on it and use the technology it may plays a key role for the prosperity of Pakistan. Import and export are the backbone similar to agriculture department if we use the technology and advance methods we may genrate more, which is exported, so through export we may genrate a high ravanue. So these are some factors through which we may plays important role in the progress of Pakistan.
