Make proper self-explanatory phrases instead of just writing single word

- Enhance technology
 - Agriculture sector
 - Industries
 - Natural resources.
- Overcome corruption
 - Transparency in tax collection
- Recommendations
- Conclusion.

Introduction:

"There is no power on earth that can undo Pakistan" said by founder of Pakistan. Pakistan came into existence on 14 August 1947 with a lot of sacrifices, but a new hope where people can live their lives according to their religion, culture and traditions, but gradually some factors derail Pakistan from progress. Some of them are corruption, illiteracy rate, lack of rule of law, energy crisis, terrorism and lack of advanced technology etc. By overcoming these challenges, Pakistan will not only achieve good status in region but also have potential to lead Muslim world from front.
