

# Climate Change in Pakistan: Causes and Consequences

## Brainstorming

→ Impact on health

Respiratory Issues

Deforestation

Low quality fuel

Waste burning

Increased poverty

Social Impacts

Social unrest

Community displacement

Eye and skin irritation

Environmental damage

Economic Impacts

Loss in fisheries

GDP Loss

Tourism decline

Crop yield decline

Contribution of neighbouring countries

Global injustice

Illegal fuel retail outlets

Lack of public awareness

Brick Kilns

Coal Usage

Endangered Wildlife

Population growth

Floods

Housing schemes

## Outline ✓

### Causes

First outline is always of "introduction"

#### 1. Deforestation ✓

a. Housing schemes ✓

b. Endangered wildlife ✓

Make proper phrases instead of writing just a single word to make your arguments more meaningful

#### 2. Air Pollution ✓

a. Low quality fuel ✓

b. Coal usage ✓

c. Use of solar panels

d. Increased number of vehicles ✓

e. Waste burning ✓

f. Brick kilns ✓

#### 3. Contribution of neighbouring countries ✓

#### 4. Global Injustice ✓

Day: \_\_\_\_\_

Date: \_\_\_\_\_

5 → Illegal fuel retail outlets ✓

6 → Lack of public awareness ✓

## Consequences ✓

1 → Health impacts ✓

a. Respiratory issues ✓

b. Cardiovascular diseases ✓

c. Eye and skin irritation ✓

2 → Social Impacts ✓

a. Social unrest ✓

b. Community displacement ✓

c. Increased poverty ✓

3 → Economic Impacts ✓

a. GDP Loss ✓

b. ~~Crop yield decline~~ ✓  
Decline in

c. ~~Tourism decline~~ ✓  
Decline in

d. Loss of fisheries ✓

4 → Environmental damage ✓

a. Scorching heat. ✓

## Introduction

Give remedial measures along with conclusion

Climate change has become an inevitable issue in the modern world, because of human negligence. After the World War I, the world was suffering from many social

moral, spiritual and environmental challenges. T.S. Eliot delineated the adversity of human condition in his poem 'The Wasteland'. In the third section of poem 'The Fire Sermon' he talked about the pollution in the River Thames <sup>that</sup> (which) was once pure and clean but the activities of modern man had polluted its water. And now there are only empty bottles, sandwich papers and cigarettes in the water. By taking the condition of River Thames as metaphor, Eliot has depicted the condition of whole world. The hazardous change in the climate is the result of human unrestrained activities. Unfortunately, Pakistan is also one of those countries that **is** **are** suffering from severe climate changes and it is struggling to manage its uncontrollable effects i.e., social, economic and health issues.
