Conclusion

Write formal and with proper
subject verb and object.

Before industrial revolution,
people have not high
skill when industrial
revolution started in 17th
century, then all sectors
have grown. Education
sector also prospers
and people educated because
technological advancement.
When people educated and
they started migration.

in developed countries. Brain drain
is better than brain in the
drain because they are intelligent
people and they can play
role in developed country when
they come in dollars any
money can be sent to home
country and his country
will be famous in developed
country because they are different
his country. They and their
family living standard will
be improved. Some people
can play better
role in their country
such as in business sector
and invention sector. Other
people opinion is good but
not valid in current situation
mainly their people leave
their country who do not
have good opportunity in
their country. Such as
the migration in their country
which result their country
not prosper.

When educated people go to developed country then they will sent remittance to their country. In developed country job opportunity rate is high. There are more factories which provide job for skillful people. Because there is demand high of skillful workers, they pay high salary to worker. which result, workers sent their salary to their family. It results, foreign countries come to home country.

Pakistan there are high skillful people but there are not job opportunities which result educated people go to developed country. Pakistan received \$21 bn in remittances in the 2022-23 fiscal year.

This remittance prevent country from default. So, brain drain is better because when their home country ~~not~~ have not job opportunities
