Nation

IV- Conclusion

Suggest measures for improving the literacy and standard of class room (i.e education)

Classrooms are the center of development for new generation. Classrooms provide the developed, critical and skilled minds to nation, in various field; as an engineer, bureaucrat and policy maker. All the classrooms of school, colleges and universities teach step by step. For example, the first thing that environment of classroom develops in youth is saying *Aslam-o-Alikum* as greetings before entering the class. This practice repeats regularly which becomes habit for later. Therefore, classrooms develop the new generation.

Avoid giving examples in introductory paragraph

Introductory paragraph should be comprehensive

It should contain brief overview of the entire statement
