(c) Conclusion

Introductory paragraph

Ahmed slaughters his own cow to get meat. One of his neighbour, observes him and uploads his video on internet while condemning his act and called for mob violence. People assembled and killed him. In todays world technology is integral part of one's all life. This which includes social media, Television etc technology is also promoting religious extremism, where people donot tolerate the people belonging from to other religions. Technology is being used to divide people on the basis of their religion and create religious conflicts. Political leaders also use technology to create divide and gain total support of the people and political legitimacy. Furthermore, technological equipements are used for the propaganda against various components

and factions of the society. Moreover, many technological corportations get fundings for instigating religious extremism. By using technology various intrests groups promote religious intolerence. Furthermore, technology is also used to successfully create the perception of intolerence in the society. So, It is a fact that technology is playing crucial role in spreading religious extremism.

Concluding Paragraph

In a nutshell, technology is playing major role in fostering religious extremism. There are various ways through which religious extremism is promoted through technology. Labelling people as extremist as one of the way, through which people are charged to escalate tensions. Further more, by showing again and again an incident of religious extremism deepens the line of conflict among people. Media is also funded by foreign intrest groups to strengthen the existing religious disturbances. Uneducated and ignorant masses upload content on social media which instigates emotions of hatred for other religious groups. More over, political leaders promote

religious extremism for their own vested intrests like political legitmacy and support. Technology is also used as a tool of propaganda. Despite the role of technology in spreading terrorism, technology can also be used for fostering national integration. by integrating different religions to Different Campaigns through media Idea for religion harmony an peaceful co-existance can play a vital role in evadicating religious extremism.
