Brain Drain

Brain drain involves the migration of highly skilled and educated youth from their native country to abroad. The factors driving it are interesting. In Pakistan, it involves numerous factors related to economy, politics and society. Pakistan's current situation is evident to every Pakistani, penetrating the ideas of leaving the country. In fact, foreign loans are burdening not only government but also the citizenry, leaving a pessimistic impact on their overall thinking patterns. In addition, continuing political wrangling, disputed streets and governance issues are adding fuel to the fire. The result of all these factors is brain drain. As every cause has its effects so ~~does~~ the effects itself has causes. In this all play, brain drain results in consequences ranging from hindrance to economic progress, social cohesion and ~~and~~ giving birth to social and cultural differences. So, the effects of brain drain are related to a country's strength.
