Evolving Landscape of Democracy.

For a country's democracy to ^{be} forceful, it should adapt to contemporary times and trends. The notion of democracy seems like an established norm of centuries. However, with the passage of time, improvements were made. Today, democracy comes with multi-partyism, giving the voters right to vote for any party of their choice. However, certain times, these political parties exploit people, because they are based on interests rather than ideologies. The well-functioning democratic systems are in Scandinavian countries with increasing voters participation and declining political parties membership. However, these former democracies are not free from challenges.

Earlier, it was ^{the} left wing to challenge the non-compliance of established democracies. But now, the right wing has taken place with new, populist ideas.
