

Importance of digital privacy in today's world.

Thesis Statement:

"Digital privacy is paramount in today's world as it protects personal information from exploitation, prevents cyber crimes, and protects individuals' autonomy. Therefore, it is required to adopt preventive measures for ensuring digital privacy."

Paragraph:

Digital privacy is crucial in today's world due to the vast amount of personal data shared and stored online. As technology advances, people are rapidly shifting to the digital world where they are persistently sharing their personal information. If this data is not adequately protected, it can be exploited by identity theft, surveillance, or unauthorized data mining. For instance, the United States has been attacked many times from external identity theft. These cyber attacks on the US are clear indication that digital privacy is paramount important. Moreover, digital privacy ensures freedom of expression, allows
