

# Romantic Relationships During CSS preparation: The journey of CSS aspirants.

plz write on mature topic plz

## Outline:

write appropriate verb

### I- Introduction

~~Thesis statement: Romantic Relationships are made on mutual understanding of CSS aspirants during their preparation. Such relations create an environment for discussion and encouragement throughout their journey.~~

~~On the other hand, it impacts on the preparation of aspirants' <sup>CSS journey</sup> badly, due to high expectations, possessiveness and trust issues among them, which leads to depression, anxiety and failure.~~

plz write short sentence

### II- How Romantic Relationships Shape the Journey of CSS Aspirants during <sup>their</sup> preparation:

A. Romantic Relationships are made

on mutual understanding of aspirants.

B. The relationship helps them to resolve their common problems about preparation.

C. It makes an environment for combined discussion on lengthy topics.

D. It becomes an ointment/bandage for hardships during preparatory journey.

E. It encourages and makes them determined to achieve their goal.

### III. How Romantic Relationships impact on the journey of CSS aspirants' preparation:

A. Romantic Relationships consume much time on discussion rather self-reading and writing practice.

B. Expectations go beyond the preparation due to emotional attachment.

C. It creates the possessiveness between

aspirants

creates

D. It ~~helps~~ <sup>kindly</sup> the trust <sup>issues</sup> due

~~to~~ <sup>it creates</sup> open mindedness <sup>mony of ex</sup> between them

E. It ~~causes~~ depression, anxiety and helplessness due to breakup.

#### IV. Suggested measures to make preparation an effective

A. make an environment of mutual trust

B. Give an space for self-reading and writing

C. Do not go beyond the ~~expectation~~ expectations because failure is part of life

#### V- Conclusion

3/5

✓ CSS preparation requires devotion, determination and tolerance for long lasting journey. During that period aspirants interact with each other and consciously or unconsciously, they engage in the romantic relationships.

This romantic relationship becomes very productive ~~during the preparation~~ because of mutual understanding and helping each other in the certain problems about preparation. The environment of discussion becomes the gintment/bandage on lengthy topics and hardships of Journey. Moreover, the relationship encourages to achieve the goal by determining and make strong each other. However,

with positivity it has negative aspects too. First, the romantic relationship consumes too much time on discussion rather self-reading and writing practices which are crucial part of

6/1

CSS preparation. Additionally, the relationship goes beyond the expectations due to emotional attachment. As a result, it creates the possessiveness, and trust issues due to open mindedness between them, which leads to depression, anxiety, helplessness and at the end it ends up with ~~break up~~ which impacts severely to the preparation. Therefore, it is important to make an environment of mutual trust, by giving the space to each other. Further, it should not be expected more than practice reality because failure is the part of life, in fact the romantic relationship has positive and negative impacts on CSS preparation but it can be improved by ~~proving their success in the~~ journey to positive measures.

To begin with, the romantic relationships are made on mutual understanding of the CSS aspirants during their preparatory journey. The relationship begins with the mutual collaboration, interaction and giving space to each other. This leads to closeness and confidence between the aspirants. Moreover, they start knowing about each other by interacting daily time. For example, two aspirants meet daily in a preparatory academy or school at routinely classes. They start knowing each other. ~~creating~~ This creates a positive gesture of confidence to come closer. Later on, they feel no any hesitation to be each other due to having a mutual common sense. Therefore, the romantic relationships starts becoming a specific bond from a typical common knowing. Hence,

the romantic relationships are made on common understanding of aspects.

Second, the romantic relationship becomes helpful for each other to resolve the common problems about preparation. Romantic relations become a source of help to solve the issues <sup>related to</sup> of each other, by sharing their notes, or by other helping materials. For example, during the CSS preparation most of the aspirant get stuck in the issues of making notes, collecting data and precisising them. Therefore, through mutual sharing of notes data and study related materials becomes very helpful for each other and it conserves their energy too. This benefits both of them and eases the journey by solving each others critical problems. Therefore, the

:65

romantic relationships are ~~more~~ helping hand in the ~~get~~ problem solution.

moreover, Romantic relationship creates/makes an environment for combined discussion on lengthy topics. The combined discussion emerges the multidimensions of single topic due to <sup>different</sup> angles discussions between two persons. This leads the openness in them to know a lengthy topic by covering it from all dimensions.

For example, The current affairs and Pakistan affairs <sup>considered</sup> topics are very length during the preparation, ~~but it becomes very easy to cover~~ therefore, for such topics, discussion is compulsory.

This discussion becomes fruitful for both aspirants, where their lengthy topic is covered by all angles and in a very clear mind. Hence, the romantic relationship makes an

environment for combined discussion  
on ~~lengthy~~ topics.

Romantic relationship  
becomes an ~~ointment~~ or ~~bandage~~  
during the ~~hardships~~ of ~~the~~ ~~preparation~~  
journey of CSS aspirants. ~~the~~ ~~relationship~~  
~~becomes~~ a ~~shield~~ against the ~~disappoint-~~  
~~ment~~ during the ~~journey~~. ~~Mostly~~  
aspirants become disappointed due  
to lack of ~~guid~~ and ~~right~~ parts of  
preparation but the ~~romantic~~ aspirants  
become a ray of hope for each other  
by ~~giving~~ ~~emotional~~ support to others.  
~~For instance,~~ the English Essay and  
precis is the common and ~~most~~  
~~lengthy~~ part of problem in CSS preparation  
which ~~mostly~~ leads to the ~~disappoint-~~  
~~ment~~ in the aspirants and ~~all~~ the  
aspirants ~~face~~ ~~tough~~ ~~hardship~~ in  
~~preparing~~ their ~~Essay~~ paper. The aspirants  
when find ~~either~~ ~~less~~ or ~~no~~ ~~progress~~  
in ~~Essay~~ they ~~quit~~ their ~~Journey~~ ~~but~~ ~~having~~

305

the supporting ~~date~~ person do not let them down. Instead it becomes an armor or bandage during their hardships of preparation.

Moreover, the romantic relationship encourages and makes them determined to achieve the goal. The relationship brings the hope for the achievement of their destination.

~~the hope ~~is~~ this relation makes to determined to do hard work at the cost of do or die.~~

example, Dr. Hejra Niazi, who passed CSS 2022, and her husband

Dr. Huzaifa mehsal were engaged in a sweet romantic relationship

during their CSS preparation and both became an encouragement

for each other which resulted in

the success of both of them. Therefore,

the romantic relationship encourages

and makes them determined to

achieve their goal.

From the above discussion, it undoubtly, it shows that romantic relationships <sup>shape</sup> the journey of CSS aspirants during their preparation. On the other hand, it also impacts badly on the CSS aspirants' preparation.

First, the romantic relationship consumes too much time on discussion rather than writing and self-reading. The discussion takes the shape of debate most of the time. The discussion goes long and long to disprove the partner. As a result, the discussion does not become a fruitful and productive, but <sup>just</sup> the waste of time. As a result, the aspirants do not give more time to their self-book reading and writing which is crucial for the preparation. For example, whenever, the topic related to gender

is in discussion then the clash emerges to understand and reach a conclusion. Later on, it changes as an egoistic manner between them and for dispoising each other both goes beyond the limit of time where book reading writing practices comes under compromise.

Further, the expectations go beyond the preparation due to emotional attachment during aspirants' journey. In the six months relationship, the expectations of companionship multiply into sixty years of destination due to emotional attachment. During the preparation, the aspirants come such a close that they expect more from each other. For example, spending nearly half of the time of day with each other at daily base, increases their emotions and expectations for being together forever.

Therefore, such expectations become their weakness which results into the fear of failure during the journey. Therefore, the expectations go beyond the preparation which impact severely on the preparation of an aspirant.

Besides this, the romantic relationship increases the possessiveness between the aspirants. Romantic relationship promotes the care for each other by protecting as by keeping an eye on each other. This careness converts into over protection and possessiveness for each other which limits the space for each other. For example, the aspirants let's informed to each other about their daily activities food, health and their mood too. This continuity of information results into the over-possessiveness by which both becomes fed up from each other. So, now their love, caring, and cleanliness

avoid writing in gossiping

converts into hate, frustration and  
feeling one which impacts on their  
preparation in a bad way.

Moreover, the romantic  
relationship creates trust issues between  
the aspirants due to their openmindedness.  
The aspirants do come from different  
background of education and different  
background of society. These different  
backgrounds of education and society  
make them suspicious on petty things  
which causes the trust issues among  
them. As elders say that, the trust  
is a binding force of any relation.

~~If it becomes suspicious the relation~~  
do not go more than few days.  
This trust issue creates the em divergence  
of ways in such a point of destination  
where no one can neither expect nor  
go further more to their journey. Hence,  
this leads to frustration in an aspirant  
due to heart break. Hence, the romantic

relationship creates trust issue between the aspirants which impacts adversely on the CSS journey of an aspirants' preparation.

At the end, the romantic relationship during CSS preparations causes depression, anxiety and helplessness due to break up. The romantic relationship becomes the victim of mistrust, over possessiveness, high expectations and consumption of much time which leaves no space for the continuation of their relation. As a result it ends with break up leading the depressing depression, anxiety and disappointment between them. As like, a person or an aspirant becomes the victim of that man's ~~the~~ <sup>avoid gossiping piz</sup> mistrust whom he/she trusted more than anyone else in his/her life. Therefore, this ~~mista~~ breakup in relationship

8x

~~creates the disappointment and anxiety which affects his/her health and preparation of CSS.~~

The above arguments about romantic relationship are heart failing which impacts badly on the <sup>CSS</sup> preparation of the aspirants. Therefore, through certain suggestions aspirants can save themselves from the worsening consequences of their romantic relationship.

First, the aspirants should make an environment of mutual trust among each other. The aspirants should look on the loyal aspect of their partner, because spending a time during study discussion and giving the importance is the witness of his/her loyalty. His/her bond of understanding is connected by the mutual understanding and trust. If this bond breaks then definitely the relation remains no more. Therefore,

:01

the aspirants should keep trusting on each other so that it should impact on their CSS preparation.

Secondly, the aspirants should give an space to each other for self-reading of books and writing practice. The aspirants should meet on occasionally after each two to three days. In this way, both gets an enough time to writing practice, and book reading. Further, it also gives an enough space to each other in the relationship. For example, when they will meet after at least three days, there would be enough data to share, and discussion with each other. Moreover, the meeting will be very pleasuring and enthusiastic due to long three days. Therefore, aspirants should meet give an space to each other for self-read and writing practice so, that their

: 6x

preparation should not be compromised.  
~~last but not the least, the~~  
~~aspirants should not go beyond the~~  
~~expectations because the failure is~~  
the part of life. The high expectations  
make human weak and creates the  
fear to face the problems. Therefore,  
he/she cannot face the failure in  
their life. That's expectations should  
be practical and limited so that  
these should be fulfilled through a  
practical way. For example, the  
aspirants during their romantic  
relationship creates the castle in the  
air which becomes the heart breaking  
when it is not fulfilled, because both  
aspirants expect to be successful in  
same way and in same time which is  
rarely possible in life. Therefore, both  
have accept the realities and  
limit their expectations and let each  
other to focus on their preparation.

: 6/5

So that they ~~can~~ <sup>can</sup> make their dreams a reality.

In the conclusion of the above discussion, it is said that the romantic relationships are made on mutual understanding desiring the <sup>CSS</sup> preparation of aspirants. However such relations also impact on the CSS preparation badly but the romantic relationships can be more productive through positive measures. The mutual understanding, finding the solutions for each others' problems about preparations and make an environment of discussion are the bandage/ointment and encouragement for the achievement of goals and shield of protection against hardships. On the other hand the excess of anything is harmful. Similarly, ~~the~~ spending much time on ~~discussion by compromising the~~ reading and writing, which:

:68

are main components of CSS preparation, generates the threat and expectations among them. Moreover, the over possessiveness often trust issues results into breakup at the extreme time preparation which causes depression anxiety and disappointment among the aspirants. Therefore, the aspirants should keep themselves in the environment of trust and limited expectations so, that both partners can seek the space in the relationship for themselves so, that their preparatory journey of CSS ~~aspirants~~ should go in a smooth way.
