Indent the paragraph. Please include the original passage in the pdf.

Last weekend, Cyclone Philine hit Odisha, a small state of India. The cyclone came from the Bay of Bengal and gradually **moved** toward the coast. The **violent** wind hit the coastal villages and destroyed their infrastructure. Luckily, weather radars **predicted** it in time and millions of people were evacuated. It was an extraordinary achievement of Indian disaster management. Moreover, the Coast Guard also rescued the crew of a tilted cargo ship in the waters of Bengal.

Title:

Efficient Indian disaster management

Philine versus Indian disaster management
