The Influence of Authors

Humans end up being affected by the authors they read. Reading, ~~like food~~, has a deeper impact than mere pleasure. One's ~~life~~ ^{also} reading preference not only defines ~~their~~ ^{one's} literary tastes but influences them ~~as well~~. Adolescent readers at some point become influenced by a poet and then with time, they are admirers of several poets. This happens to mature people as well if they are not avid readers as one's undeveloped personality is influenced by the stronger personality of poets. With time, readers become critical as they start comparing various poets. Such critical thinking is good as it protects one from being influenced by a single personality or a few people. Diversity of ~~views~~ in one's mind shapes ~~Essence~~ in personality of humans.
