L. ~~Classrooms~~ creates the diversity of culture

M. ~~Classrooms~~ give the growth for a civic society

N. ~~Classroom~~ produce a civilized and prosperous nation

III. Suggested Measures for improving the classrooms

A. make a classroom attractive by maps and charts

B. ~~Install~~ the digital instruments of learning and practice work

C. Ensure equal participation of students without any discrimination

IV. Conclusion

Educational institutions are the primary place for the dynamic growth and prosperity of a nation. Therefore, the environment of that institution and its classrooms matter a lot, because these classrooms develop a new generation of leadership for the future of nation. Further, a classroom enhances the critical thinking and skill development in youth which results in a technical human resource for market. Moreover, it creates the responsibility of helping each other through sharing the resources. Additionally, classroom becomes the center for exchanging of ideas between the learners, by which the tolerance and acceptance increases for the norms and values of other culture. Besides that,

it also creates the emotional attachment, sympathy, and brotherhood among the students which make a strong bond for pluralistic approach against the challenges and difficulties. As a result of these, classroom produces a diverse, civic and civilized nation. However, ~~the classrooms can be improved by the maps and charts of world's different societies, cultures and historical arts which further attracts the students to know from out of pandora box. Similarly, the usage of digital instruments and equal participation without any discrimination make a healthy class. In fact, classrooms as a center of learning, critical thinking, future planning, which produces the leaders for nation.~~

To begin with, Classroom* develops a Nation new generation of the nation. The classroom works as a center of gathering where students from all the different areas, caste, religion and sect assemble in a single room. That's it works as a platform of unity for the new generation. For example, in a single classroom students from different parts of country or society, interact with each others and know about themselves. ~~This interaction and closeness develops the sense of a single nation in them where they become no longer strangers for each other. Therefore, classroom becomes a center development of new generation of youth.~~

Besides that, Classroom emerges the leadership in the nation. It creates the quality of leadership ^{in youth} by character building and critical thinking in the youth. It also gives the understanding of national prosperity to students, by developing their skills. For instance, Classroom gives the sense of national unity by creating the capacity of leadership in students as a monitor or C.R. (Class Representative) of class. ~~The monitor or C.R. becomes the responsible man~~

~~Joe his class.~~ He listens ~~the~~ problems of his classmates and resolve them. ~~These things~~ make him ~~a~~ good representative of class or leader of the class. Therefore, the classroom enhances the leadership qualities in youth.

Further, classroom creates the critical thinking in students. Classroom gives the ^{Judgemental ability} ability of judgement to differentiate between right and wrong, ~~through his ability of understanding and critical thinking.~~ For instance the ~~head boy of class,~~ resolves the most of the issues among the students. He plays the role ^{of} a critical man to ensure justice and ~~to~~ consolidate the both parties ~~by~~ an inbetween solution, in which both parties become agree willingly. Therefore, such decision

quality creates criticality in the head of the class to make a possible solutions. Therefore, it can be said that, classrooms create a critical thinking in students.

Moreover, classrooms develop skills in the students of the nation. A classroom encourages the students to develop their skill through practical work. It creates the environment of practical activities, for example, the management of time ^{by} coming/leaving at a class on time, and making creative assignments and developing a good presentation. These skills helps a lot to student in their practice life, to become punctual, good developer, and good communicators.

Therefore, it evident that classrooms develop the skills in the youngsters of Nation.

Additionally, a classroom generates a technical human resource for market. It develops the students according to the market demand. It provides the technical education to students according

to the requirement of market. For instance, classroom produces the businessmen, entrepreneurs, I.T experts, and property dealers by giving them the education of their field. As a result, of completing their education/degrees, these experts serve in the markets in various fields of country's areas. Hence, this shows that classroom produces a technical human resource for the future of the nation.

In the conclusion of all discussion, it can be said that classrooms are the center for learning, critical thinking and future planning, where the decision makers and the leaders of the nation grow. However, classrooms can be improved by making it attractive with the help of

charts, maps and historical artistic pictures.
It also can be better by reducing discrimination and promoting of digital instrumental usage without any differences. Therefore, it will result in a civilized, civic and culturally diversified nation, which will become a single unit against the challenges and difficulties. Similarly, it will make a nation as a single strong, united impenetrable stand through,

brotherhood, sympathy, and emotional attachment.

As a additionally, it will enhance the tolerance and acceptance of the other culture's norms and values through the various exchange of

~~ideas between students who come from different culture, society, caste and religion.~~

moreover, it will enhance a good technical human resource through skilled labour for development of the national economy.

Besides that, classroom will make a rational and critical thinking unit which will

result in a emergence of leadership
