

Climate Change in Pakistan: Causes and Consequences.

Brain Storming:-

Outline:-

Causes:

Make proper phrase

Carbon Emissions

Green houses Gases

Deforestation

Desertification

Industrial And Vehicle Pollutions

Using Non Renewable Energy

Financial Problems ~~for~~ developing Renewable Energy

Volcanos

Ignoring COP (conference of Paris) Protocol

Consequences:-

Global Warming

Health Issues

Ozone Depletion

Sea Level Rise

phrase it correctly

Hazard for Wild animals

Weak foundation (focus on grammar and sentence structure)

Make phrases instead of writing single word

Address the knowledge gap

Add more arguments

Introduction:-

"Climate Change does not respect borders; it does not respect who you are rich and poor, small and big. Therefore, this is what we call Global Warming/Challenges which needs global unity" (Banke Moon).

Climate change is not a problem of Pakistan only but all of the World facing climate change. Pakistan is low contributor to climate change causing. Most of the developed countries are responsible for climate change as a result of the world facing problems like Global Warming, Health Diseases, Dangerous for Wild Animals. ~~Unfortunately~~ Developed countries following protocols to get rid of Global Warming but unfortunately Pakistan is suffering to follow these protocols. The reason which climate change occur it is due to Carbon Emission, Using Fossil fuel as Energy (non Renewable energy), Deforestation, Desertification, Industrial pollution etc. Climate Change is a very serious matter it must be addressed properly. It must be the duty of each and every country to take precautions to decrease temp 1.5°f.
