Brain drain causes and consequences

Introductory Paragraph

Brain drain refers to the migration of people from their homeland to a developed countries in search of good life and job. It was first

In 1960 this term "Brain drain" was firstly used by United Kingdom when few skilled people started emigrating from under developed countries to developed country. The main causes of brain drain are less opportunities in the country, high inflation rate, unemployment rate and low educational facilities. People desire for luxurious life. The consequences of brain drain are low economic growth, loss of creativity, and no patriotism for homeland.
