2. Historical Overview of Agriculture Sector of Pakistan

3. Challenges Faced by the Agriculture Sector of Pakistan

3.1. Food insecurity

3.2. High Input Costs

3.3. Water Scarcity

3.4. Inefficient Irrigation Facilities

3.5. Climate Change

3.6. Low Productivity & Yields

write full form

Day: _____

Date: _____

4. Solutions to the Agricultural Challenges of Pakistan

4.1. Announcing Agriculture Packages

4.2. Harnessing Solar Power

4.3. Addressing Deep Structural Issues

4.4. Enhancing Availability of High-Quality Seed

4.5. Boosting Research & Development

4.6. Technological Advancement

add land reforms as well as it is the most important remedial measure

5. Conclusion

Agriculture sector is the backbone of Pakistan's economy. It is also the main source of income in the country. It plays a central role in the economy of Pakistan by employing almost half of the population of Pakistan. However, agricultural problems pose significant challenges to this sector. The challenges being faced by the country's agriculture sector include food insecurity, high cost of inputs, water scarcity, inefficient irrigation facilities, climate change and low productivity and yields. Despite these challenges, implementation of effective policy measures such as agricultural packages, harnessing solar power, addressing deep structural issues, enhancing research and development and using technological advancement can help to overcome the issues faced by agriculture sector of Pakistan. In short, these solutions have to be brought in effect to overcome the agriculture challenges of Pakistan.
