

# Assignment 1

Batch 74

## English Essay

Haiqa Sheikh

Topic:- climate change in Pakistan: Causes & Consequences.

Outline: Causes

(1) Natural Factors

- change in weather patterns
- Geographic location & climate sensitivity

(2) Human activities

- Deforestation
- Industrial Pollution
- Fossil fuels uses
- Poor urban Planning
- carbon Footprint

(3) Inefficient use of water Resources

- water usage in agriculture, poor irrigation practices.

(4) Poor waste management

- Disposal of waste
- Harmful gases

(5) weak Environmental Policies

- Harmful Practices unchecked.

## Consequences

- 1) Environmental Impact
  - Increased flood & droughts
  - Rising temperatures
- 2) Economic Impact
  - Damage to infrastructure
  - Agriculture sector at risk
  - Climate related illness → increased health cost
- 3) Social impact
  - Rise in poverty
  - Rise in unemployment
  - Threat to food & water security
- 4) Political instability
  - failed to address climate issues
  - Dispute over water distribution among provinces.
- 5) Technological & development Challenges
  - climate change hinders technological progress

## Recommendations

- Promote sustainable agriculture
- Govt needs to address climate change issues
- Invest in renewable energy
- Raise public awareness & promote ecofriendly practices
- Strengthen the management system.

## Conclusion:-

Thus, climate change is one of the most critical challenge faced by Pakistan, driven by both global & local factors.
