Q.No.
8

People have become overly dependent on technology

Due to the comfort and ease created by the technology, people have become overly dependent on technology.

Outline

1- Introduction

2- History of scientific discoveries

3- Manifestations of the overuse of technology

over-dependence

a- Rapid adoption of smart phones

b- Increase in the cyber crimes

c- Political manipulation through social media

d- Reduced participation in outdoor activities

e- Vicious cycles of weaponization

4- Reasons for overdependence on technology

- a- Bridging the rural urban divide
 - b- Accessing quality education
 - c- Avoiding overcrowded public transport
 - d- Improving agricultural productivity
 - e- Manipulating large number of people via social media
- Unclear arguments

5- Detriments of the overdependency on technology

- a- Loss of jobs of the unskilled workers
- b- Drastic climate change due to overuse of technology
- c- Digital theft of sensitive information
- d- Looming threat of heavy weaponization
- e- Decline in critical thinking and problem solving

6- Recommendations to limit the over use of technology

a- Educating people to use technology effectively

b- Legislating policies for the limited use of technology

c- Subsidizing public transport

d- Equipping workers with skills.

7- Conclusion

With the rise of innovations, technology has taken part in every walk of life. The use of technology is very common in the modern world.

It is used in communication, education, health, transportation, agriculture and all the other spheres of life. Its induction in every sphere of life has created comfort and ease.

Due to this, people have become overly dependant on technology. The manifestation of overdependence on technology is evident from the rapid adoption of smart phones, increase in cyber crimes and political manipulation through social media. Further, the participation of people has largely decreased in outdoor activities due to the use of technology.

Furthermore, states have ~~involved~~ ^{become} involved in the vicious cycle of making

weapons to strengthen ~~itself~~ ^{themselves}. The reasons of overdependency on technology include but are not limited to bridging -the rural urban divide, ~~accessing quality education and improving agricultural productivity~~. In addition, ~~avoiding overcrowded public ^{transport} and shifting to private transport for ease~~ is another cause of over use of ~~technology~~. The politicians also over use it ~~for manipulating people~~. All these uses have detrimental effects. The unskilled ~~workers~~ are losing their jobs. ~~Climate is also drastically changing. Stealing of sensitive information is increasing. Further, constant threat of heavy weaponization is existing~~ last but not least, there is a continuous decline in -the critical thinking and ~~problem solving skills of people~~. Nonetheless, Educating people, legislating policies and equipping people with skills can help in ~~limiting the over dependency on technology~~.
