c) obtaining the more knowledge about history and civilization

d) uprising of a child growth: the punctuality of parents

e) procuring the achievement from small to high attainment.

5. conclusion.

"To achieve the steady and slow struggle towards a dream is the first and foremost initiative of an aspirant; why not one secures the less than that of expectations, but one's constant effort would definitely pay off.

Therefore, similarly to go above whether to reach the highest floor of a building or to achieve a colossal dream, the first is from ground scale to sky. William Wordsworth. Having observed the said expression, the reality is obvious that every success asks for the bottom level struggle. Meaning that to reach the nearest place of a dream is noteworthy. To add to that inspiring the highest place at the global level is very imperative to go from low to high approach. Pursuing the dream of life to get the freedom of nation, struggling for the separate homelands, making the global consensus on the proliferation of the global peace,

plz work on expression and formality of language

do not add meaningless expression

rising the nationalist movements and obtaining the true implementation of global laws are the directly boasting force of achievements.

Furthermore, it, in the same manner, starts from the individuals' persistent struggle is to follow an inspiration of a big dream to serve humanity, to face social stigma on getting the dream into reality and to obtain the more knowledge about history and civilization. Thus, the highest inspiration for an achievement is a long struggle of a life; it always commences from bottom to high level - Global scale.

To start with, one is aspiring to the highest place, it is the great honorable to achieve the second or even the third rank. This phrase contains the constant struggle and makes the dream high whether it seems impossible. The second and third place always

rely on the long struggle and a big dream as well. As Noam Chomsky said in his book, "The Cold Struggle, Superpower, whether an individual or country ever plans for a long destination that they reach its nearest site" similarly, keeping dreams zenith, destination would touch the foot.

The ~~idea~~ ^{dream} of one, prominent leader is to pursue the achievement for a nation. Whenever leaders came in the history, they made their names written in the history. For instance, Muhammad Ali Jinnah, Nelson Mandela, Mahatma Gandhi, Abraham Lincoln and so on, their struggle remained for their nations; finally, they got the dreams and opened the ~~door~~ ^{door} for personal lesson in the world. Moreover, history is replete with such struggles of people who preferred their dreams at the peak. Therefore, they became successful.

Struggling for the separate homeland is another way of aspiring to the highest place. Historically, every nation had been the dream getting freedom and making a separate homeland. Nelson Mandela wrote in his book, "A long walk to freedom" - struggle for separate homeland comes from inner feelings neither it is learnt nor injected by the outer motivation. People even do not care about their lives; they wear the clothes and become ready for a die ~~been~~ for the sake of land, that facilitates them the basic fundamentals.

The global consensus on the proliferation of peaceful world is the long struggle. In the contemporary world, the grand consensus is a big deal and hard and fast rule. World is encountering the global climate change, Artificial Intelligence threat, ~~region wars, terrorism and social~~

unrest as well. For tackling them, global institutions - United Nations, Conference of Parties, International National Counterterrorism Authority and Non Proliferation Treaty are making the consensus among the powers, but somehow the goals have been acquired. This consensus is also a way of the highest place.

The rise of nationalist movements are the leading point of an aspiring the highest. As it says, the highest place whether second or third is a dream of any separatist movements. Overall in the world, according to the International Counter Authority (ICA), 1591 separatist and nationalist movements are active, but one of the most growing is such movement which directly trigger others to pursue the same manifestation. All the movements believe that struggle is the leading element, securing the

objectives.

The true implementation of the international law is the prolong effort of the international institutions. International law is applicable for the country and its dispute with other country. United Nations issued the declaration that international law is a hope of those states which are surviving from the genocide, racial discrimination and equality for all. So, to implement it into the true sense is the foremost priority of UNO and other global bodies. Most of the parts of laws have been implemented in the case of Armenia and Azerbaijan and Somalia and Ethiopia.

remain the same

The global revolutions ~~remains the~~ key factor to aspire the highest place in which a tiny part is achieved. It is honourable. History ^{reflects} ~~reflection~~ itself through the repetitions of events. Arab Spring,

and Iran revolution are both enough to prove that their effects still impact the Arab countries and massive population. Due to the Arab Spring, the monarch regimes were challenged, whereas in the Asia, Iranian revolution changed the concept of Persian empire. All the said changes make the clarity that aspiration for a dream is a path to achieve it.

The new wave of resistance is a reaction of the suppressed masses. Slowly and gradually, the world is moving towards the new change of history. People suffered the most because of hybrid regimes; dynastic politics and military-led government. They took the unexpected and lay out to challenge all the oppressions. It has been seen in Sri Lanka, Bangladesh and Syria whatever people did then, history reminds.

p;lz follow grammar

~~The mass reaction is a great inspiration to reach any goal of a nation.~~

The food struggle and its security is a persistent dream of a human being. Food is the first nutrition that is responsible for growth, health, safety and requirements. According to the report, ^{showed} ~~real reality~~ by (World Global Hunger Index) 29 million people are surviving for food and nutrition. This struggle for the food, it is the mega responsibility to work for it, even all the global agencies and organizations are playing their role in humanitarian crises. Therefore, it is honorable to reach its minimum achievements.

Furthermore, the religious ideological resistance is also a hope of ~~a~~ religious leaders. Mostly, in the 21st century, the famous discussion is religion.

According to the book, Clash of Civilizations, written by Samuel Huntington, he said in his book, the prominent debate of the world in the coming era is the religions and civilizations, as the famous example of India, Hinduism and Israel Zionism. This fact truly spells out that India is going to the top global leader of the world and Israel is also in focus thoroughly. So, their unethical struggle is to reach on the second and third place.

Along with, gender equality and representation is the huge struggle of the history. Equality and representation in term of gender is very imperative. For it, the most of the organizations, United Nations, WADA, Beijing Conference, SDG and so on, are paying their focus on the gender equality. And they also achieved the most in terms of the representation.

Moreover, this is a suitable proving point that it is honorable to reach the second.

Another side, the inspiration of a big dream for an individual is the foremost step towards achievement. When one comes in a world, he decides his life either in struggle or in comfort zone. Keeping in view this, Bill Gates expresses the fact. If you are born poor, it is not your fault, but if you die poor it is your fault. So, not need to be awallys first, but follow the first, you have to first and second position. Therefore, a big dream always asks for a consistency, discipline and courage.

Societal stigma and criticism is the part and parcel in the journey towards achievements. The highest place in a life has to face criticism and pressure

of society. All these come in the favour of those who have the credibility to counter and alleviate the imbroglis of achievement.

As Russel said in his book, Unpopular essays, the achievement, attained without criticism and stigma is just futile progress and meaningless. Thus, securing the parties and pleasures, the criticism and stigma have to be adjusted.

To obtain the more knowledge about history and civilization is another struggle of throna. Knowledge about anything builds the confidence in regards to purposeful existence. Immanucl Kant, said, knowledge is itself of struggle to compete the world, preceiving history and civilization. Whoever wants to do meaning life, has to go through the the wisdom of knowledge. Without it, an inspiration to the highest-goals is nothing but timewaste.

Therefore, knowledge is a guarantee of triumph.

The growth of a child under the punctuality of parents is another destination to secure the highest place. In the 21st century, the debate of nature vs nurture is quite hearable around the world. However, in the retrospective and perspective of a child growth, both matter under the struggle of parents. Koffi Anan, "Uprising of a child towards the colossal achievements is the nature and nurture of parents who teach their child - "Success is the real identity of a man" - This builds the concept of parents, who are true founder of any achievement.

Achievement in a life from bottom to the high level is the destination of human beings. Human beings have been striving for their goals and objectives.

Whatever innovations are introduced to human's struggle, Religions, Science, philosophers and history ever incentivized, have been and are pushing them for more growth and progress. The famous Scientists were not toppers, but ~~embraced~~ embraced the second place and carried it out. Ergo, man is ~~an~~ a social animal, he demands the change.

To conclude it whoever is aspiring to the highest-place, it is also honourable to reach the second or even third rank. This obvious true, the struggle does not observe the rank or status, but small achievement should be celebrated and appreciated. ~~The second or third rank also comes with struggle,~~ pursuing the dream of life for freedom of a nation, struggling for the separate homeland; obtaining the true implementation of international

laws, uprising the masses resistance against the oppressions, and persisting struggle for food security and human-dignity crisis. ~~to add to that,~~ on the individual level struggle also decides the strength and growth, following an inspiration of a big dream, facing societal stigma and criticism, and uprising the of a child grow and punctuality of parents. Thus, there is no denying the fact, any attainment of achievement is futile without the prolong places and position from lower to higher ranks. "progress and growth is fertile, if one ignores the low step of stair; any struggle comes through the singularity of manifestation; like growth of Universe." Martin Luther King II.

overall application of ideas is fine good
