It depicts that social media make the people able to connect with whole world. Except all previous pros of social media in globalization, there are some challenges also exist. It spreads misinformation which impacts all over the world due to interconnectedness. As well as, it also spreads cultural homogenization and digital divide among countries at global level. In all, this essay will explore social media and globalization role in various spheres of the world.

Social media has revolutionized cultural exchange and enabling people from diverse background to share and learn or discover new cultures. Social media platforms like Instagram, Facebook and YouTube channels have created virtual spaces for the users where they can share their traditions, customs and values. The digital cultural sharing not only way to preserve one's cultural heritage but also it enhances global connectivity among people of different cultures. Also, through the process of globalization and utilization of social media tools people learn and access different cultures from the comfort of their own homes. To sum up, social media platform and globalization make people able to exchange cultural traditional, customs and values.

Additionally, the process of globalization and extensive use of social media increases political awareness among people on national as well as global level. The online news platforms like Al-Jazeera, YouTube channels and twitter play vital role to spread global news from one corner of the world to another corner. For example the movements like Black lives

matter and Me too movements spread through social media platforms. They make people to aware about global conflicts and political uprising. Also, the social media tools speed up the process to deliver information across continents just in few minutes. To sum up, political awareness is easily accessible to all over the world through social media.

The global interconnectedness and access of social media enhance economic opportunities for people. There is no confined boundaries in present world to earn money. The social media platforms such as Fiver, Dazr, Amazon and e-commerce provide uncountable earning opportunities. The people who have access to internet may earn from foreign countries through social media platforms. In addition to this, through internet one can easily access international companies for job; it is not only convenient but only provide better earning jobs than physical one. In short, social media platforms minimize distances to earn handsome amount and access global companies.

In addition, social media platforms and globalization fastening global collaboration among states, people as well as continents. They bring unity among all states of the world in order to tackle global issues. In contemporary times, the organization WHO, IMF as well as GitHub fastening global collaboration on global affairs and issues. Also, the issues like climate change, human rights violation also become focal point to resolve where all stakeholder agree on same page. Social media platforms are blessing

Issue:

Except all positive aspects of social media in globalization which enhance global development, bring all stakeholder under the roof of globalization and effective use of social media platform; there are also some challenges of social media in the path of globalization.

Social media platforms also spread misinformation which badly impacts on the way of globalization. The misinformation which spread through online platforms enhances chaos and disturbance at global level because the twenty-first century is the century of interconnectedness it makes the world a global village. Imagine a false news spread by any platform can spread all over the world like fire in the forest because of unlimited use of social media platforms. It brings chaos in individual, states and continents which enhances instability and conflict within the world. So, the lack of censorship in social media platforms spread misinformation which poses as great hurdle on the path of globalization.

Similarly, cultural homogenization is a real threat to globalization which spread through social media and dominance of any country and stakeholder. Also, the idea of eurocentricism prevails in social media from google to youtube because of western dominance. In addition to this, the tiktok trends a recent example which spread western aesthetics all over the world. The world is divide in different classes.
