

## Translation - 24.

When the Palestine issue is presented in the UN for settlement, this international institution recognizes individual freedom and decided to find a solution. Two state solution was proposed to resolve the Palestinian issue, and the resolution was accepted. However, it has not been implemented for over seven decades. On the contrary, Israeli forces are killing innocent and unarmed Palestinians and the Gaza strip has been completely destroyed due to ongoing war since last 2.5 months. With American support, Israeli forces brutally killed more than twenty thousand Palestinians including children and women. Many people are living without shelter and now their life is at risk due to lack of food and health facilities.
